GENERAL INFORMATION

Abstract Book

Abstracts will be available online in the Conference Edition of the JCU from 7am on Monday 9 November.

Activity Challenge

Join in the Activity Challenge running from 9-11 November and complete tasks on the virtual platform to earn points for a chance to win a pair of Apple AirPods.

AV Information

Full AV information & instructions have been sent to all speakers in advance of the meeting. Any queries should be directed to BAUS Events (events@baus.org.uk).

BAUS 2020 Virtual Platform

The Virtual Platform includes session streaming, live polling, a virtual exhibition and an attendee news feed to post comments & photos.

There will be three streams playing content at various times each day. All sessions will have a discussion and comments area where delegates can ask questions and engage in further debate.

Certificates of Attendance

Certificates will be emailed to delegates from Monday 16 November.

Certificates for teaching courses: Research Methodology and Paediatric Urology will only be issued to those who complete the assessment form and obtain a pass rate of 80%. The Assessment form will be emailed from Monday 16 November.

Continuing Medical Education

This meeting has been accredited with CME points as follows:

Monday 9 November	6 points
Tuesday 10 November	6 points
Wednesday 11 November	6 points

Highlights Newsletter

Each morning at 7am on 9-11 November there will be a BAUS Daily Highlights Newsletter emailed to all pre-registered delegates that will detail the programme for the day ahead.

ePosters

Full details of the presenters and ePosters will be available to view on the meeting platform. For this year, ePoster sessions will be run differently.

Each ePoster session has been allocated a 30-minute session, where the co-chairs will provide a review & discussion of the ePosters and conclude with the take home messages.

GENERAL INFORMATION

Exhibition & Sponsorship

A special thank you to all the exhibitors & sponsors who are supporting this year's meeting. We have an exciting virtual exhibition, please do visit the virtual stands and interact with them.

The virtual exhibition is available throughout the meeting and we also have dedicated time set aside to visit the exhibition at the following times each day:

1000 - 1200

1400 - 1600

Teaching & Skills Courses

The Research Methodology, Male Factor Infertility, Insights into National Selection and the Local Anaesthetic Transperineal Biopsy Skills Course will be pre-recorded and uploaded on the BAUS 2020 virtual platform and available to view on demand for up to 12 months.

Registration

Registration is available until 10am (GMT) on 5 November.

Survey & Feedback

We encourage delegates to complete the post-event survey, which will be available via the platform. Feedback and suggestions for future years are also welcome.

Twitter & Social Media

BAUS 2020 is on Twitter:

@BAUSurology

#BAUS20

Delegates are reminded of the GMC and BMA guidance in respect to social media.

Watch it Again

Once a session has finished, the content will be moved to the 'Watch it Again' area on the virtual platform for delegates to view later. Sessions will be available for a period of up to 12 months.

Date for Diary

BAUS Annual Meeting

21-23 June 2021

All Conference content, speakers and timings are correct at time of publication. The Organisers cannot be held responsible for changes due to circumstances beyond their control, including the withdrawal of speakers from the programme, for any reason.

WELCOME FROM THE IMMEDIATE PAST-PRESIDENT

On behalf of BAUS I am delighted to welcome you to the BAUS 2020 Virtual Annual Meeting. It is impossible to have envisaged the events which have occurred since our last, very successful, Glasgow meeting in June 2019. That now seems a long time ago. This meeting was originally due to take place in June 2020, but on March 19th we took the decision, in the light of the COVID-19 crisis, to postpone until later in the year and I'm delighted that we are able to hold the 75th Annual meeting virtually. Because of this, by the time of the actual meeting I will be the Immediate Past President and my successor, Tim O'Brien, will have taken over the role of President. I wish him and Jo Cresswell, who became Vice President in June, all the very best for the future.

This year, as you will be aware, marks the 75th Year of the formation of our organization. When BAUS was formed in 1945, 29 surgeons interested in Urology met with the purpose of discussing the challenges of urological practice and training and the arrival of the "new" NHS. Three quarters of a century later we now have almost 2000 members and are facing the biggest healthcare crisis in a generation.

2020 also happens to be the 25th year since The Urology Foundation (TUF previously the British Urological Foundation until 2009) was formed by a joint initiative between BAUS and the British Journal of Urology (BJU). The British Association of Urological Nurses (BAUN) is also 25 years old this year and the Royal Society of Medicine (RSM) Section of Urology is an impressive 100 years old. All these organisations joined forces to mark 100 years of urological care in the UK. We laid great plans for a rolling celebration and series of events to mark these important milestones, increase public awareness and raise funds for all of urology, under the common banner of "Urology 2020 - 100 years of excellence". These plans have largely been put on hold by the current situation and they will carry on into next year, culminating in a celebratory meeting and gala dinner which has been pushed back a year to October 2021.

When we decided to build the meeting around the theme of "FutUrology: Celebrating the Past, Present and Future of Urology", none of us were aware of just how much the landscape was about to change. 2020, so far, has been a remarkable year and one which has seen many challenges and huge changes in our practice and lives in general. This will be reflected in the programme and there is a specific session related to delivering urological services during the COVID-19 crisis.

WELCOME FROM THE IMMEDIATE PAST-PRESIDENT

Many congratulations to our medal winners this year who are Professor Prokar Dasgupta (St. Peter's), Professor Margaret Pearle (St Paul's) and Mr Simon Harrison (BAUS Gold Medal) - all extremely well-deserved. I am delighted that we will this year also get to hear Mr David Nott deliver the BAUS 75th Anniversary Humanitarian Lecture, as he had to cancel his previous talk in BAUS 2016, as he had to deploy to a warzone.

I am very grateful for the huge amount of work done by the Programme Committee, led by our Honorary Secretary, Asif Muneer, in organising this meeting, very ably assisted by Ian Pearce (Honorary Secretary Elect) and the BAUS events team of Harry Heald and Louise Finch. It takes a great deal of effort to make such a large and complex meeting run seamlessly. I must also thank our Sections, abstract markers, and all the speakers, chairs and presenters for giving up their time and expertise so readily.

Our industry partners have generously, and without question, supported this rescheduled meeting and for this we are very grateful. Please do visit the virtual stands and interact with them. Also, the entire meeting would not be as successful and enjoyable without your input and interaction as a delegate - so, thank you.

This meeting should prove to be a real opportunity for us all to regroup after what has been, for many, a difficult and challenging year. I would hope that we are all able to recharge our urological, professional, and social batteries and re-connect with the whole urological community - which has pulled together excellently over the last few months.

Duncan Summerton
Immediate Past-President

WELCOME FROM THE HONORARY SECRETARY

The unprecedented COVID-19 pandemic has resulted in a major impact on lives and livelihoods throughout the world. Let us not forget the healthcare workers who unfortunately died as a result of COVID-19 whilst caring for others and the indefatigable efforts of all our colleagues within the NHS during this difficult period. A special tribute to our urological colleague Mr Abdul Mabud Chowdhury who unfortunately passed away in early April and leaves behind a wife and 2 children.

As a result of government policy and regular Trustee discussions, it was clear and unrealistic that the annual meeting could still be scheduled in June 2020. However, an opportunity to hold the meeting in November 2020 was seized upon and now due to the ongoing COVID-19 pandemic we are holding the annual meeting virtually.

On Monday we have an exciting plenary session focusing on minimally invasive surgery with our Past President Mr Adrian Joyce opening the session followed by Professor Naeem Soomro, RCS England Lead for Robotic Surgery and concluding with this year's St Peters Medal recipient Professor Prokar Dasgupta. On Tuesday we have a special session on the impact on delivering urological services during the COVID-19 pandemic.

The final plenary session will include state of the art lectures including Professor Kevin Fong OBE, presenter of BBC Horizon and unrivalled in his ability to combine medicine with astrophysics! Finally, Professor Margaret Pearle who is the recipient of this year's St Paul's Medal will conclude the session with a lecture on global urolithiasis.

We have invited several distinguished international and national experts to ensure that delegates can benefit from contemporary knowledge and opinions with a global perspective. I am grateful that Professor Trinity Bivalacqua from Johns Hopkins has accepted the invitation to deliver this year's BAUS guest lecture.

There are several additional guest lectures including Professor Richard Kerr (BJUI Guest Lecture), Mr David Nott (BAUS 75th Anniversary Humanitarian Lecture, @NottFoundation) and Professor Hashim Ahmed (JCU Guest Lecture). We are also delighted to welcome ex-England Rugby Player and NBC Commentator Alex Corbisiero to take part in The Urology Foundation's (@TUF_tweets) special session on testicular cancer. The list of guest speakers is obviously far too extensive to thank and name them all - but to all those contributing - thank you very much and we look forward to hearing your talks.

WELCOME FROM THE HONORARY SECRETARY

The Research Methodology, Paediatric Urology, Modern Management of Urinary Stone Disease, Male Factor Infertility, Insights into National Selection and the Local Anaesthetic Transperineal Biopsy Skills Course will be available on the BAUS 2020 virtual platform to view on demand. The number of abstracts submitted this year was 618 - the highest since 2006 and reflects the interest and excitement building up toward the meeting. For this year, ePoster sessions will run in a different manner. Each ePoster session has been allocated a 30-minute slot, where the co-chairs will provide a round-up review and discussion of the ePosters and will define the take home messages and key discussion points.

There will also be ample opportunity to visit the virtual exhibition. It is important that industry and sponsors are supported by delegates as without them the annual meeting would struggle. We are also delighted that a number of companies have laid on symposia, so please view as many of these as you can. A special thanks to all the sponsors, industry and companies who are attending and supporting this year's meeting.

This is my first meeting as Honorary Secretary and I would like to thank both Harry Heald and Louise Finch for all their unrelenting commitment and hard work as well as the unwavering support of the BAUS President and BAUS Trustees. Thanks also to Mr Ian Pearce, Secretary Elect, for organising the teaching courses and providing invaluable support. At the end of the meeting not only do we ask for feedback, we also act on the feedback. As a result of previous feedback, the meeting has been shortened to 3 days and we will incorporate free lunchtime catering for delegates when we return to holding BAUS as a physical meeting.

Asif Muneer
Honorary Secretary

SATELLITE SYMPOSIA

Monday 9 November

1400-1445 | **Karl Storz Satellite Session**

KARL STORZ Bipolar Techniques

The Topic of Bipolar Enucleation of the Prostate (BipolEP) and Enbloc Resection of Bladder Tumours (ERBT)

Dr Lukas Lusuardi, Salzburg, Austria

Tuesday 10 November

0800-0830 | **Boston Scientific Satellite Session**

Prostate Cancer Survivorship: Are we getting it right?

A survivorship care plan following prostate cancer surgery should aim to optimise functional and andrological outcomes, aligned with the needs of the patient.

However, with little consensus on the scale of the survivorship problem, and a growing body of evidence suggesting it might be bigger than previously thought, should we be looking at this more thoroughly?

Mr Maj Shabbir MD FRCS(Urol) and **Mr Arun Sahai** PhD, FRCS (Urol), Department of Urology, Guy's Hospital

Stream 3

1200-1400 | Andrology and Genito Urethral Surgery

Tips for Managing Heart Sink Andrological Problems

Chair: **Professor Suks Minhas**, Imperial College London

1200-1205 Introduction from the Chair

1205-1220 Haemospermia - When to Investigate and How?

Miss Maria Satchi, Darent Valley Hospital, Dartford

1220-1240 Therapeutic Pathways for Treating Chronic Scrotal Pain

Miss Judith Dockray, Sunderland and South Tyneside NHS Foundation Trust

1240-1300 Medical and Surgical Management of Male Genital Lymphoedema

Professor Nick Watkin, St George's Hospital, London

TUESDAY 10 NOVEMBER

12.00-14.45 CONTINUED

Stream 1

1300-1400 | Delivering Urological Services during the COVID-19 Pandemic

Chairs: **Miss Sian Allen**, University College Hospital, London and **Mr Joe Philip**, Southmead Hospital, Bristol

1320-1340 | Prioritising Urological Surgery During the COVID-19 Pandemic

Professor Duncan Summerton, Immediate Past-President of BAUS & University Hospitals of Leicester

1340-1400 | Delivering Urological Care Using a Hub Model - How We Adapted During the COVID-19 Pandemic

Professor John Kelly, University College Hospital, London

1400-1445 | Olympus Satellite Session

See page 11 for further details.

Stream 2

1200-1400 | Oncology Controversies in Pelvic Cancer

1300-1315 NPCA 2020 Annual Report
Professor Noel Clarke, Christie Hospital, Manchester

1320-1400 Controversies in Bladder Cancer

Chair: **Miss Jo Cresswell**, James Cook University Hospital, Middlesbrough

1320-1330 The Ideal vs Real World Bladder Cancer Pathway

Miss Jo Cresswell, James Cook University Hospital, Middlesbrough

1330-1340 Bladder Cancer Updates - Imaging, Surgery, Trials

Professor James Catto, Royal Hallamshire Hospital, Sheffield

1340-1350 Translational Science for a General Urologist - What's on the Horizon

Mr Richard Bryan, University of Birmingham

Stream 3

1200-1400 | Andrology and Genito Urethral Surgery

1300-1320 Therapeutic Options for Premature Ejaculation
Professor, Dr Ege Serefoglu, Biruni University School of Medicine, Istanbul

1320-1340 Dealing with Genital Self-Image Issues

Mr Gordon Muir, King's College Hospital, London

1340-1400 Complication's Following PD Surgery

Professor David Ralph, University College Hospital, London

TUESDAY 10 NOVEMBER

16.00-18.00

Stream 1

1600-1630 | General

ePoster Session 8: General
Urology - BPH/LUTS: Discussion & Round-up
Chairs: **Mr Toby Page and Mr Matthew Liew**

1630-1700 | Oncology

ePoster Session 9: Prostate
Cancer 1 - Optimising Diagnostics:
Discussion & Round-up
Chairs: **Professor Caroline Moore and Professor Nicolas Mottet**

1700-1730 | Oncology

ePoster Session 10: Prostate Cancer 2 -
Optimising Treatment: Discussion &
Round-up
Chairs: **Professor Derya Tilki and Mr Nikhil Vasdev**

1730-1800 | General

ePoster Session 11: Management,
Governance, Education and Quality
Improvement: Discussion & Round-up
Chairs: **Mr Rono Mukherjee and Mr John McCabe**

Stream 2

1600-1645 | Endourology

Delivering an SWL service in the post NICE/GIRFT/COVID era
Chairs: **Mr Ben Turney**, Churchill
Hospital, Oxford and **Mr Hari Ratan**,
Nottingham University Hospital

1600-1610 | Introduction from Chairs

1610-1615 | Setting up the Service
Mr Will Finch, Norfolk
& Norwich University Hospital

**1615-1625 | Analgesia, Coupling Delivery,
Physics of ESWL**
Professor William Roberts, University
of Michigan

**1625-1635 | Getting the Best out of the
Machine**
Mr Milad Hanna, Imperial College
London

1635-1645 | SWL in the COVID era
Mr Stephen Gordon, Epsom Hospital,
Surrey

Stream 3

1600-1800 | BAUS Section of Trainees (BSOT)

**When Training Goes Wrong & What
Have We Learnt From COVID-19?**
Panel: **Mr Sotonye Tolofari**, Royal
Liverpool Foundation Trust; **Mr Josh
Burke**, President Association Surgeons
in Training (ASiT); **Mr Hari Ratan**,
Nottingham University Hospital;
Professor Phil Cornford, SAC Chair,
Royal Liverpool Foundation Trust; and
Miss Clare Jelley, Oxford University
Hospitals

1600-1610 Introduction, Bronze & Silver
Cystoscope Awards
Mr Sotonye Tolofari, Royal Liverpool
Foundation Trust

1610-1640 Trainee Presentations - The
Good and Bad of Training
1 Does the introduction of a nurse
Surgical First Assistant (SFA) in Robotic
theatre improve
operating opportunities for trainees?
Miss Jennifer Clark, Stepping Hill
Hospital, Stockport

TUESDAY 10 NOVEMBER

WEDNESDAY 11 NOVEMBER

09.00-10.00

Stream 1

0900-1000 | State of the Art Plenary Lectures - Improving Surgical Outcomes

Chairs: **Mr Prashant Patel**, University Hospital Birmingham and **Professor Abhay Rane OBE**, East Surrey Hospital

0900-0930 | How We Can Learn from NASA to Eradicate Surgical Errors and Never Events

Professor Kevin Fong OBE, Consultant Anaesthetist, University College Hospital, London

0930-1000 | From the Lower Pole to the North Pole - Lessons from Science and the Future Direction of Global Urolithiasis

Professor Margaret Pearle, UT Southwestern Medical Center, Dallas, USA

Stream 2

0900-1000 | BAUS Meeting for Core Trainees in Urology

Chair: **Ms Anna O’Riordan**, Freeman Hospital, Newcastle

0900-0905 | Introduction

Ms Anna O’Riordan, Freeman Hospital, Newcastle

0905-0920 | Welcome to Urology

Mr Tim O’Brien, President of BAUS and Guy’s Hospital

0920-0940 | Urology Training: The Future is so Bright!

Miss Jo Cresswell, Vice-President of BAUS and James Cook University Hospital, Middlesbrough

0940-1000 | BAUS FY & CT Audit/QuIP competition Presentations: Round-Up

Ms Anna O’Riordan, Freeman Hospital, Newcastle

Stream 3

0900-0930 | **Oncology**

ePoster Session 12: Bladder Cancer Diagnosis and Treatment: Discussion & Round-up

Chairs: **Ms Helena Burden and Ms Alex Colquhoun**

0930-1000 | **General**

ePoster Session 13: General Urology - Emergency & Trauma: Discussion & Round-up

Chairs: **Ms Katie Moore and Mr Max Mokete**

1115-1200 | **Coloplast Satellite Session**

See page **11** for further details.

WEDNESDAY 11 NOVEMBER

12.00-14.00

Stream 1

1200-1230 | JCU Guest Lecture: The Future of Urological Cancer Management - The Next 2 Decades

Chair: **Professor Ian Pearce**, Manchester Royal Infirmary and Editor, JCU

Professor Hashim Ahmed, Imperial College Healthcare NHS Trust

1230-1300 | BAUS 75th Anniversary Humanitarian Guest Lecture

Chair: **Mr Erik Mayer**, The Royal Marsden NHS Foundation Trust

Mr David Nott OBE, Consultant General Surgeon, Chelsea and Westminster Hospital NHS Foundation Trust

Stream 2

1200-1400 | Andrology Joint BAGURS/AGUS session | Male Urethral Reconstruction MDT

1200-1220 Challenges in Urethral Reconstruction Surgery

Professor Christopher Chapple, The Royal Hallamshire Hospital, Sheffield

1220-1245 Hypospadias Surgery: Getting it Right First Time

Mr Paul Anderson, Russell's Hall Hospital, Dudley

1245-1310 Things I wish I knew 40years ago - Lessons from a Lifetime of Reconstruction

Professor Tony Mundy, University College Hospital, London

Stream 3

1200-1400 | Female, Neurological & Urodynamic Urology Challenges in FNUU and Audit Matters

Chair: **Mr Arun Sahai**, Guy's Hospital, London

FNUU is a subsection dealing with the most complex and diverse of urological problems. Both simple and complex urological problems often have no strong evidence base to help guide management decisions.

Therefore, FNUU has committed to tackling some of these issues and have developed 3 consensus documents. We present this work in this section. We would welcome input from BAUS members about issues you would like addressed for the future and would invite you to give suggestions during this session on the comments & discussion forum.

WEDNESDAY 11 NOVEMBER

12.00-14.00 CONTINUED

Stream 1

RESEARCH METHODOLOGY

Director

Mr Vincent J Gnanapragasam,
University of Cambridge

Suitability

This course is suitable for registrars and appointed consultants looking to develop or start research as part of their training or their clinical work. The course is geared to equip trainees or new consultants with the basics of research methodology. Participants are encouraged to have done GCP training prior to enrolling on the course.

Outline

The course is intended to teach the basics of how to undertake and perform research. The course will explore the different types of research which can be undertaken, and the basic components required. The course will cover research ideas including how to participate in clinical trials, lead research and identify sources of funding. Topics will also include how to navigate the modern IRAS, HRA and ethics process and also other regulatory aspects. Trial methodology as well as tips and ideas on how to optimise your findings to help you present and publish your work.

The faculty will represent a wide range of expertise and knowledge from both academic and clinical backgrounds to answer any questions participants may have.

Objectives

At the end of this course participants should have a good understanding of:

- The context of research in the modern NHS
- How to plan and execute a research project
- Common hurdles and barriers in clinical research
- How to join or start a clinical trial
- How to get a study funded from local to national
- How to ensure your results are publishable and impactful
- The current regulatory framework in clinical trials

Faculty

Mr Alastair Lamb, Consultant Urologist and Senior Academic Fellow, University of Oxford

Mr John Aning, Consultant Urologist, Bristol Urological Institute, Southmead Hospital

Mr Richard Skells, Study Manager, Pharmaceutical Company

Ms Anne George, Research Associate, CRUK Cambridge Cancer Centre, University of Cambridge

Mr David Thurtle, Academic Clinical Fellow and SpR, East of England Deanery

Professor Ian Pearce, Consultant Urologist, Manchester Royal Infirmary and Editor, JCU

Mr John McGrath, Royal Devon and Exeter

LOCAL ANAESTHETIC TRANSPERINEAL BIOPSY

Directors

Mr Alastair Lamb, Churchill Hospital, Oxford
& **Mr Rick Popert**, Guy's Hospital,
London

Outline

The transperineal route is the preferred method for repeat prostate biopsies and for those with infection risk due to improved cancer detection rates, particularly of anterior lesions, and reduced faecal contamination. Typically, these biopsies have been performed under GA, which limits the scope of use.

However, devices are now available to perform transperineal biopsies under LA in the outpatient clinic. This course provides an overview of the rationale behind LATP in the clinic with training in the approaches currently used in the UK.

Objectives

- Understand the benefits of TP biopsy over TRUS biopsy including the evidence regarding detection of clinically significant prostate cancer and infection rates.
- Know the different methods available for LATP including: Precision point; Camprobe; Koelis; Venflon

Faculty

Mr Vincent J Gnanapragasam, University of Cambridge

Mr Mark Laniado, Wexham Park Hospital

Mr Michael Sut, Luton and Dunstable University Hospital NHS Foundation Trust

Mr Francisco Lopez, Uro-oncologist and Robotic Surgery Fellow, Oxford University Hospitals NHS Foundation Trust

Mr Jonah Rusere, Clinical Nurse Specialist, Royal Free London NHS Foundation Trust

Mr Soni Xavier, Maidstone and Tunbridge Wells NHS Trust

Mr Hide Yamamoto, Maidstone and Tunbridge Wells NHS Trust

MALE FACTOR INFERTILITY COURSE

Director(s)

Mr Asif Muneer, Consultant Urological Surgeon and Andrologist, University College London Hospitals and **Mr Rowland Rees**, Consultant Urological Surgeon and Andrologist, University Hospitals Southampton

Outline

This course will provide a comprehensive overview for the diagnosis, medical and surgical management of male factor infertility and assisted reproductive techniques.

Urologists often have limited exposure to diagnosing and treating male factor infertility within their training. The role of the urologist in assessing the infertile male is becoming increasingly important in the diagnostic pathway particularly with the changes in the NHS England commissioning policy. Men with azoospermia should be investigated by a specialist. Urologists are best placed to investigate and treat these patients as well as linking with local fertility units to offer an integrated service.

The course is aimed towards both trainees and consultants.

Objectives

By the end of the course the delegates should be able to understand the underlying causes and assessment of male infertility and the diagnostic/management pathway in keeping with NHS commissioning policies. Understand the principles of complex surgery for surgical sperm retrieval and offering a service within their network.

The course aims to provide trainees with the essential background for FRCS(Urol) preparation and also provides established Consultants who are interested in developing a practice an opportunity to gain advice on setting up the service, obtaining mentorship and tips on how to develop fertility pathways.

Faculty

Mr Rowland Rees, University Hospital Southampton

Mr Hussain Alnajjar, University College London Hospitals

Miss Pippa Sangster, University College Hospital, London

Dr Lynne Robinson, Birmingham Women's NHS Foundation Trust

INSIGHTS INTO NATIONAL SELECTION

Director

Mr Peter Grice, Leicester General Hospital

Outline

Aimed at those applying for a National Training Number in the 2021 round, this course will be most relevant to CT2s, and trust grade doctors looking to step on to the training programme.

Hear from experienced trainees about what they wished they'd known at your stage, discuss the challenges you will face and learn about the opportunities available to you, and most importantly learn how you can get up that next rung on the ladder.

Faculty

Ms Charlotte Roberts, Royal Albert Edward Infirmary, Wigan

Mr Ben Starmer, Royal Liverpool and Broadgreen Hospitals

Mr Paul Sturch, Darent Valley Hospital, Dartford

Miss Neha Sihra, St George's Hospital, London
