

Andrology and Genito-Urethral Surgery

The BAUS section of Andrology and genito-urethral surgery serves to maintain the highest standards of practice in the field of andrology (male reproductive and sexual health) and surgery of the male genitalia. This includes the medical and surgical management of penile malignancy, urethral stricture disease, erectile dysfunction, Peyronie's disease, male infertility and a number of other rarer disorders.

We aim to maintain high standards through audit / research, educational courses, and effective communication between our members.

The Annual Meeting of the Section will take place during the BAUS Annual Meeting in Glasgow (on 25 June 2012 at 10.00hr) - click on the highlighted link below for further information.
