

Working with Urolink

UK urologist or interested partner

You might want to work with Urolink for a number of different reasons ranging from wanting to work abroad or by giving equipment, educational materials, donations or sponsorship. If you want to become part of the Urolink faculty, then just complete and return a [membership application form](#) to us.

Medical Students

Urolink does not specifically recommend locations for medical students wishing an elective period in the developing world. Students wishing to spend time in such an environment are advised to seek their faculty's elective office unless they can be embedded as a member of a Urolink team going to a specific centre for part of their elective period.

Overseas urologists

You may wish to work with Urolink to help improve the urological education or services in your home country or a country with which you have an involvement. For further information on how to get involved, please visit [getting involved](#) or for further information on becoming part of the Urolink faculty, please complete and return a [membership application form](#) to us.
