

Challenges During Training – Abstract Guidelines

Submissions open to consultants, trainees and associate specialists.

BSoT are hosting an exciting and original session for BAUS 2020- 'When Training Goes Wrong'

We would like to invite abstracts from trainees and trainers sharing challenges or problems you have encountered during your career. These experiences may be related to clinical or surgical events, interactions with colleagues or patients, personal challenges or problems or indeed anything that has affected your training. We would like to hear both trainee and trainer perspectives.

Those accepted will be invited to present their experience as part of plenary discussion using a single PowerPoint slide as an aid. Others may be used to supplement discussions. Expert guests, and those in attendance, will discuss the different experiences and look for shared learning.

Please submit abstracts in the following format using a total of 250 words:

Name:

Job title:

Title of Problem/Challenge:

Background:

Problem:

Outcome:

Learning:

Questions for the panel/audience (if applicable):

Please indicate during submission:

-If you would prefer for your experience to be discussed anonymously

- If you are happy to be contacted by the BSoT team to discuss your experience prior to the conference?
