# LIST OF EXHIBITORS

## BAUS 2026 Annual Meeting is a sponsored event.

All companies that will be sponsoring the event are named and have no input into the content of the programme and selection of speakers, except where they have a dedicated sponsored symposium session, which is clearly identified in the conference programme.

BAUS 2026 Annual Meeting receives exhibition sponsorship from Pharmaceutical Companies and other Trade Partners.

# THE MUSEUM OF UROLOGY @ BAUS 2026

BAUS is back in London, the city where it all began, for the first time in 40 years. The first BAUS Annual Meeting was held on 28-29th June 1945 at the Royal Society of Medicine and the Royal College of Surgeons (where a dinner took place despite the devastating Blitz damage of 1941).

The following day saw a visit to the Stoke Mandeville Spinal Injury Unit where Sir Ludwig Guttmann was pioneering intermittent catheterisation for his patients. The 1946 meeting was also in London, then BAUS began its now familiar travels around the countries it represents with the 1947 meeting held in Glasgow. The 82 annual meetings have been held in 21 different towns and cities in Scotland, Wales, Ireland and England.

This year at BAUS London 2026 the old-style Museum stand will be back. Integrated into a seating area with comfortable chairs and tables it will be a great place to meet, catch up, rest your legs but also learn a little about the history of urology as you top up your caffeine levels.

2026 sees 100 years of the TURP; first introduced in America in 1926 by Maximillian Stern. So, a large part of the display will reflect that history and tell that story. There will be antique resectoscopes of many historical designs from before and after the introduction of the Hopkins rod lens as well as instruments which show the patients' options before TURP. You will also find out why it took so long for TURP to be accepted in Great Britain and of those British pioneers of minimally invasive endourology who did champion this American invention.

The Museum of Urology History Display at BAUS London 2026 will be sponsored by Karl Storz UK, a company closely associated with the history of endoscopy. I'm looking forward to bringing the History Display back to BAUS this year and to seeing you all there.

# WELCOME FROM THE PRESIDENT

**It is with great pride, and enormous pleasure, that I welcome you to London for the 2026 BAUS Annual Meeting. This is the first time in 40 years that England's capital will play host to the meeting, and what better venue could there be, than the recently refurbished Olympia in the heart of bustling Kensington. I hope to see and connect with as many of you as possible during our three-day meeting in this state-of-the-art facility.**

This year's meeting once again raises the bar beyond expectation and aims to outshine last year's meeting. No easy feat considering the 2025 meeting was the most successful meeting in the history of BAUS. Again, we are delighted to share that we received over 600 abstracts and of course, I am grateful to all our reviewers for doing such a fantastic and swift job of reviewing these abstracts against a very tight deadline.

In 2025 in Manchester we welcomed 1,328 in-person delegates with an additional 163 registering for the virtual experience, a record number of delegates, which I hope we will surpass for 2026. With three days of exceptional scientific content, social and networking opportunities for everyone and an outstanding trade exhibition in the heart of the amazing city of London, this is an event not to be missed. Thank you to our sponsors whose support is vital to our meeting and our activities throughout the year, please do take time to visit the Exhibition Hall.

I am extremely grateful to the BAUS events team; Abi Lester, Ellie Pakes and Senthil Raja Kumar for organizing what I am confident will be a very smooth running meeting, and of course to Mo Belal, the VP for Education, for curating the scientific content with the help of Rob Calvert, Deputy VP for Education and the Section Chairs who have all done an amazing job in delivering their respective offerings.

Over the three days we have over 80 hours' of scientific content across the spectrum of urological practice comprising scientific session, as live and semi live surgery, guest lectures, poster session and much, much more.

We are sure to generate challenging discussions both in and out of the auditoriums and this represents a vital role for speakers, chairs and delegates alike.

My thanks to all of our amazing session chairs who give freely of their time and expertise and likewise, to all speakers and presenters whose presence and contribution raise our meeting further still.

In addition to all of this, we have the usual stellar collection of course, and this year Rob Calvert has led on this to ensure delivery of nine teaching courses and eight skills courses making up an additional 33 hours of meeting content. These courses are wide reaching and are sure to book to capacity early, so please register for them as soon as possible to prevent disappointment.

I am sure you will agree that with so much high quality content it is impossible for me to "highlight" everything, but I would draw your attention to our guest lectures on the Monday. These are definitely not to be missed with Peter Reed OBE, three-time Olympic gold medalist speaking at 11.15 and followed immediately by Andrew Hung, world renowned voice of authority on AI giving us his perspective and vision for AI in Urology.

On the Tuesday morning, I am delighted to announce that Prof Sir Mike Richards CBE, the first National Cancer Director at the DoH and the first inspector of hospitals for the CQC, will deliver the BJUI Guest Lecture. Sir Mike chairs the National screening Committee and you can guarantee that his talk will be food for thought and will provoke much discussion.

Later the same day we have the pleasure of journalist and broadcaster Mishal Husain who will deliver a guest lecture entitled "Communication in a skeptical world". It's difficult to imagine this being more apt than in the current climate, and our thanks to Mishal, (who is of urological heritage) for giving up her time to contribute to our meeting.

## Welcome from the President continued

The final day of our meeting will see some of our flagship workstreams with a session on Widening Participation, chaired by Jo Girling, Mahua Sahu, Brian Duggan and Neil Fenn to kick start the day and a session on Sustainability chaired by Tharani Nitkunan and Joe John later that morning.

The JCU Guest Lecture entitled "Endourology in the Future: Robotics, Scopes, Intelligent Fluid Management and the Next Era of Stone Surgery" will be delivered on Wednesday afternoon by Steffi Yuen, definitely one to attend for all.

I would like to offer my sincere thanks to our overseas guests and speakers, their presence offers an added richness and diversity of opinion and discussion which enhances our meeting for everyone.

As is customary, we will be celebrating our medal and award winners with a session on both Tuesday and Wednesday morning, please do come and celebrate the achievements of this impressive collection of colleagues.

My congratulations to Graham Watson, John Gearhart, SS Murali, Vaibhav Modgil, Bhaskar Somani, Alan McNeil and Ed Nickel for their massive contribution to British Urology.

Congratulations also to Duncan Summerton and Julian Shah who will both receive Honorary Membership of BAUS for their dedication and contribution to BAUS over their long illustrious careers.

Please could I ask all BAUS members to attend the AGM at 10.30 on the Monday morning, this is the business end of the meeting and should last no more than 30 mins, but there are important issues which require our attention.

This will lead into the Presidents Address and the handover to Joe Philip the incoming BAUS President. I would like to take this opportunity to thank you all for your support and engagement during my tenure as President and for entrusting me with the role. It has been the absolute privilege of my career and I shall pass the baton to Joe knowing he will be outstanding in every way and that BAUS is fortunate to have him at the helm for the next two years.

Thank you  
See you all in London

**Ian Pearce**  
BAUS President

# WELCOME FROM THE PRESIDENT ELECT

**It is a genuine pleasure to welcome colleagues, partners and friends to the British Association of Urological Surgeons Annual Scientific Meeting #BAUS26 at Olympia in Kensington. Your presence reflects the strength of our professional community and the shared commitment we hold to advancing patient care, education and innovation across urology.**

Kensington has long been associated with discovery, progress and public service. From the Great Exhibition of 1851, which showcased the transformative power of science and industry, to the modern redevelopment of Olympia as a centre for collaboration and learning, it provides a fitting setting for our Annual meeting that brings together expertise from across the UK and around the world to exchange ideas, build networks and shape the future of our specialty.

This year's programme reflects both the depth of our specialty and the pace of change across healthcare. I am particularly grateful to Mo Belal, Vice President for Education, and Rob Calvert, Deputy Vice President for Education, together with Abi Lester, Head of Events, and colleagues Ellie Pakes and Senthil Raja Kumar, for their leadership in curating such an outstanding and forward-looking programme.

Across the meeting, we will explore the transformation of outpatient services and new models of planned care, examine the growing impact of artificial intelligence on surgical practice, and consider how innovation in robotics, endoscopy and intelligent fluid management is shaping the future of stone surgery. Sessions addressing survivorship and complications in uro-oncology, male infertility, and emerging clinical challenges such as ketamine-induced uropathy further highlight the breadth, complexity and evolving nature of modern urological care.

Equally important are the conversations about our workforce and professional development. The Global Training Initiative and international fellowships, alongside the development of portfolio pathway and post-CCT fellowship networks, reflect

our commitment to creating clear, high-quality career pathways for trainees and consultants alike. Sessions on widening participation and sustainability reinforce our determination to build a profession that is inclusive, resilient and future-ready. Together, these themes underline a simple message: clinical excellence must sit alongside service innovation, education and workforce support.

Most importantly, this meeting is about people. I would like to thank every speaker, chair, trainee, nurse, allied professional and industry partner who contributes their time, insight and energy. Your engagement is what makes this community strong.

As we look ahead, our direction as an Association is clear. We are determined to be dynamic, proactive and outward-looking—working together as one team to shape a strategy that strengthens our workforce, embraces innovation, and ensures that urology across the British Isles continues to lead internationally.

Finally, I would like to thank Ian Pearce for his outstanding service and leadership to BAUS over the past decade. As I take on the role of the 42nd President of BAUS, I look forward to serving you, our patients, and our profession over the next two years.

**Joe Philip**

President-Elect, British Association of Urological Surgeons

# WELCOME FROM THE VICE PRESIDENT FOR EDUCATION

**I am delighted to welcome you to BAUS 2026, hosted for the first time at the rejuvenated Olympia in West London. This year's meeting represents another step forward, not only in scale but in ambition, and I am confident it will both challenge and inspire.**

I write this not only in my role as Vice President for Education, but on behalf of an outstanding group of colleagues, Section leads, faculty, and the BAUS HQ team. This meeting is very much a collective effort, reflecting the energy, commitment, and strength of our community.

The 2026 programme brings together over 70 sessions, more than 250 speakers, and over 100 session chairs – offering a breadth and depth of content that reflects modern urology in all its diversity. As in previous years, every sub-specialty is represented across each day, allowing delegates to tailor their experience and maximise the value of their time.

Our plenary and sub-plenary sessions remain central to the meeting. Highlights include New Model for Planned Care chaired by Ian Eardley, Impact of AI on Surgical Care chaired by Naeem Soomro, Side Hustle and New Opportunities in Urology with Vaibhav Modgil, and the BAUS/BJUI Global Training Initiative led by Joe Philip. These sessions reflect both current practice and future direction, from workforce transformation to innovation and global collaboration.

We are also proud to host this year's BAUS guest lectures. Peter Reed will share his experience as a triple Olympic gold medallist, offering powerful insights into resilience and performance. While, Mishal Husain will explore communication in a sceptical world, an increasingly relevant theme in modern healthcare.

Our scientific guest lectures include Professor Andrew Hung on the future applications of AI in urology, the BJUI Lecture will be delivered by Professor Sir Mike Richards – Chair of the Care Quality Commission (CQC) – and the JCU Guest

Lecture will be led by Steffi Yuen. These speakers bring perspectives that extend beyond traditional urology and encourage broader reflection on leadership and practice.

Alongside these, the programme includes a wide range of clinically focused and thought-provoking sessions. Highlights include Ketamine Induced Uropathy, Complications, Nightmares and Survivorship in Uro-oncology, Taking Your Stone Service to the Next Level, Male Infertility Masterclass – Things You Can't Learn from a Book, and What's New in Urology & Best of BAUS. These sessions capture the practical and relevant nature of the meeting.

Education and training remain at the heart of BAUS. We aim to support colleagues at every stage of their career with content that is meaningful, applicable, and forward-looking. A strong programme of satellite symposia, poster sessions, and industry collaboration will provide further opportunities to learn and engage.

Beyond the scientific programme, BAUS offers a unique opportunity to reconnect with colleagues, build new relationships, and share experiences. The exhibition space will once again be a hub of activity, contributing to the distinctive BAUS atmosphere.

Finally, I would like to thank everyone involved in delivering this meeting especially Abi Lester, Ellie Pakes, Senthil Raja Kumar, Wes Hutchins, and Hannah Doyle for their outstanding organisation, and Robert Calvert for his continued support and help.

I very much look forward to seeing you all at Olympia London for BAUS 2026

Platform/App launches on 8th June

# BAUS SECTION OF ANDROLOGY AND GENITO-URETHRAL SURGERY

Andrology has evolved rapidly over the past decade, moving from a niche interest to a core part of everyday urological practice. Patients are living longer, expecting more, and rightly focusing not just on survival, but on function and quality of life. This year's BAUS AGUS programme reflects that shift—practical, relevant, and grounded in what we actually do in clinic and theatre.

The programme brings together a broad range of topics across the spectrum of andrology, with a clear emphasis on decision-making and technique. We start with a video-led surgical session focused on managing complexity—because even the most straightforward cases have a habit of becoming interesting. From priapism to prosthesis revisions and circumcision, the aim is to share real-world approaches to challenging scenarios and, just as importantly, how to avoid getting into trouble in the first place.

We then turn to the functional consequences of pelvic cancer treatment. As outcomes improve, the focus increasingly shifts to what comes next for patients. This session looks at urethral stricture disease, erectile dysfunction, infertility, and fistula—highlighting practical strategies to optimise recovery and long-term quality of life.

Genital cosmetic and reconstructive surgery continues to generate both interest and debate. With increasing patient demand and evolving techniques, this session offers an honest look at current practice, including lessons learned, complication management, and the latest BAUS consensus guidance—helping to separate good practice from good marketing.

Male infertility remains a cornerstone of andrology, but one that can feel variable in practice. This masterclass is designed to simplify that landscape, focusing on when to intervene and how best to do it.

From surgical sperm retrieval to varicocele management and vasectomy reversal, the emphasis is on practical tips and reproducible techniques.

Our Peyronie's disease session takes a more interactive approach, using real cases, audience voting, and panel discussion to explore the range of surgical options. There is, as you know, rarely a single "right" answer.

We conclude with penile cancer; covering everything from early diagnosis to complex reconstruction, the session reflects current practice and future direction, with a focus on balancing oncological outcomes and functional preservation. Following on from last year's success, we are also pleased to offer a dedicated Andrology for the General Urologist course. This is aimed at providing a clear, practical framework for managing common presentations, with an emphasis on safe decision-making and knowing when to refer.

Overall, the programme is designed to be useful, and directly applicable to practice. If you leave with a few new ideas, a couple of technical tips, and perhaps one complication avoided, we will consider that a success. As ever please feel free to speak with anyone from the section committee about what you would like to see more of. Look forward to seeing you all in London!

**Ayo Kalejaiye**

Chair, BAUS Section of Andrology and Genito-Urethral Surgery

**Vaibhav Modgil**

Vice-Chair, BAUS Section of Andrology and Genito-Urethral Surgery

of Urological Surgeons

# BAUS ANNUAL MEETING

ACC LIVERPOOL  
21-23 JUNE 2027

# BAUS SECTION OF ENDOUROLOGY

**This year's BAUS, back in London for the first time for some years, promises to be a fantastic event. We look forward to welcoming you the Endourology Section led sessions, which should encompass the usual mix of great scientific quality, stimulating discussion, good hearted banter and a lot of fun! We are a friendly, inclusive section and everyone is indeed welcome to attend and join in. There are a wide range of topics, which will provide interest for the specialist and generalist alike. Our aim is to make learning as practical as possible so that it can really impact our daily practice and help us look after those tricky patients.**

On Monday (14.15-15.45) we kick off with a session helping us to 'Take our stone service to the next level'. We will cover topics such as optimising our MDT's, business cases for stone nurse specialists, new equipment developments and how to work better within Urology Area Networks. We will also have an intriguing Urolink talk on experiences of setting up a service in a low resource setting. Our BPH session this year (Monday 1630-1730) will help us to unpick some of the misconceptions and controversies in BPH management. When to surgically intervene in complex patients is a challenge to us all, whether that is due to frailty, bladder function or the myriad of new surgical options.

Tuesday is our busiest day and kicks off with a review of the current state of play of Artificial Intelligence within the Endourology sphere (Tuesday 10.45-11.45). At 13.15-14.15 we have our session on the Greener Stones Pathway, led by those involved in the recent GIRFT initiative. This will no doubt give food for thought as we consider how we can make our practice environmentally focused, as well as patient focused. The day finishes with 'Contemporary decision making in Endourology follow up' (Tuesday 15.45-16.45) helping us grapple with those awkward questions of who and for how long we should keep seeing patients.

Our last session is on Wednesday (14.00-15.30) and will go out with a bang, as we revise our highly successful State of the art 'as live' surgical cases. We will be looking at suction, tricky bladder stones, mini-PCNL and complex stents.

There are 2 Endourology Section poster sessions this year (Stones, Imaging and Upper Tract Disorders 1 and 2) on Tuesday 14.15-15.15 and Wednesday 08.00 - 09.00. There have been some brilliant abstracts submitted covering the entire breadth of Endourology and these promise to stoke lively debate, as they often do.

Beyond the academic sessions there is also the 'Modern Management of Stone Disease' course which is running on the Monday afternoon. After a fallow year in 2025 the course is back, bigger and better than ever and is a valuable opportunity to get 'right up to date'.

**Hari Ratan**  
BAUS Section of Endourology

**Jake Patterson**  
Vice Chair, BAUS Section of Endourology

**Alistair Rogers**  
Secretary, BAUS Section of Endourology

The British Association  
of Urological Surgeons

# SECTION OF ENDOUROLOGY MEETING

HILTON NEWCASTLE GATESHEAD

10 & 11 September 2026

# BAUS SECTION OF FUNCTIONAL & RECONSTRUCTIVE UROLOGY

**The Section of Functional and Reconstructive Urology would like to extend a very warm welcome to BAUS 2026 as it returns to London.**

Our 3-day programme offers sessions which will appeal and be helpful to all urologists.

We're very grateful to this year's international invited speakers Professor Enrico Finazzi Agrò (Rome, Italy) and Benoit Peyronnet (Rennes, France), and to our UK colleagues from Urology and allied specialties, for their expert opinions.

It's poignant that we begin on Monday afternoon (14.15-15.45) with a "must see" session dedicated to ketamine induced uropathy chaired by Mo Belal and Ruth Doherty. Alison Downey will be joined by psychiatrist Irene Guerrini and Rachel Isba from Alder Hey Hospital will share her experience of the rise of ketamine use in children. An MDT discussion follows with Katie Moore, gastroenterologist and hepatologist Carl Hammond, and pain specialist Richard Wassall, providing focused practical advice.

Tuesday is a full-on FRU day starting with the "mesh maligned" subject of primary and recurrent stress urinary incontinence (10.45-11.45) chaired by Nadir Osman, James Moore and Alison Downey. We're welcoming urogynaecology colleagues Fiona Reid and Stephen Bradley to discuss the Latitude trial, the role of the PFMDT and PDAs in stress incontinence surgery. Charlie Dunford's analysis of patient selection and optimisation is followed by the UK versus European perspectives of outcomes from Enrico Finazzi Agrò and Hashim Hashim.

Our regular highlight session (10.45-11.45) is essential for all FRU devotees and a concise summary for general urologists covering what's new and what you need to know. Section Chair, Suzanne Biers will be joined by Enrico Finazzi Agrò and Sanad Saad as we hear of the advances made in our subspecialty from Hashim Hashim, Marcus Drake, Mahreen Pakzad, and urogynaecologist Karen Ward.

Our joint session with the section of oncology (14.14-15.15) addresses a variety functional of challenges faced in patients with pelvic cancers issues, and is chaired by Vishwanath Hanchanale, Simon Fulford and Arjun Nambiar. We'll hear from Omar Al-Kadhi, Jeremy Ockrim, Neil Barber, Ramesh Thurairaj and Findlay MacAskill

Our poster sessions top and tail the day, chaired by Bushra Abdelqader, Arjun Nambiar (08:00-09:00), and then Alison Downey and Hashim Hashim (15:45-16:45).

Wednesday's essential programme covers the management of recurrent UTIs and receives a fresh "rethink" with an update chaired and contributed to by Mehwash Nadeem and Ased Ali (11.30-12.30). Hear new ideas about the urinary microbiome, the BAUS BOOMERANG audit and "new and improved" approaches to prophylaxis from Magda Kujawa, Bob Yang, Sachin Malde, and invited speaker, microbiologist Carmel Curtis.

For our robotic surgeons, our final and most ambitious session is essential viewing (14.30-16.00). Chaired by Arun Sahai and guest Benoit Peyronnet, we'll hear from Neha Sihra, Rachel Barratt and Ben Challacombe. Nikita Bhatt, Arjun Nambiar and Sachin Malde along with Benoit Peyronnet, will be presenting their prerecorded tips and tricks and 'how to do' videos.

We'd like to thank all our contributors and look forward to catching up with colleagues!

**Suzanne Biers**

Chair, BAUS Section of Functional & Reconstructive Urology

**Magda Kujawa**

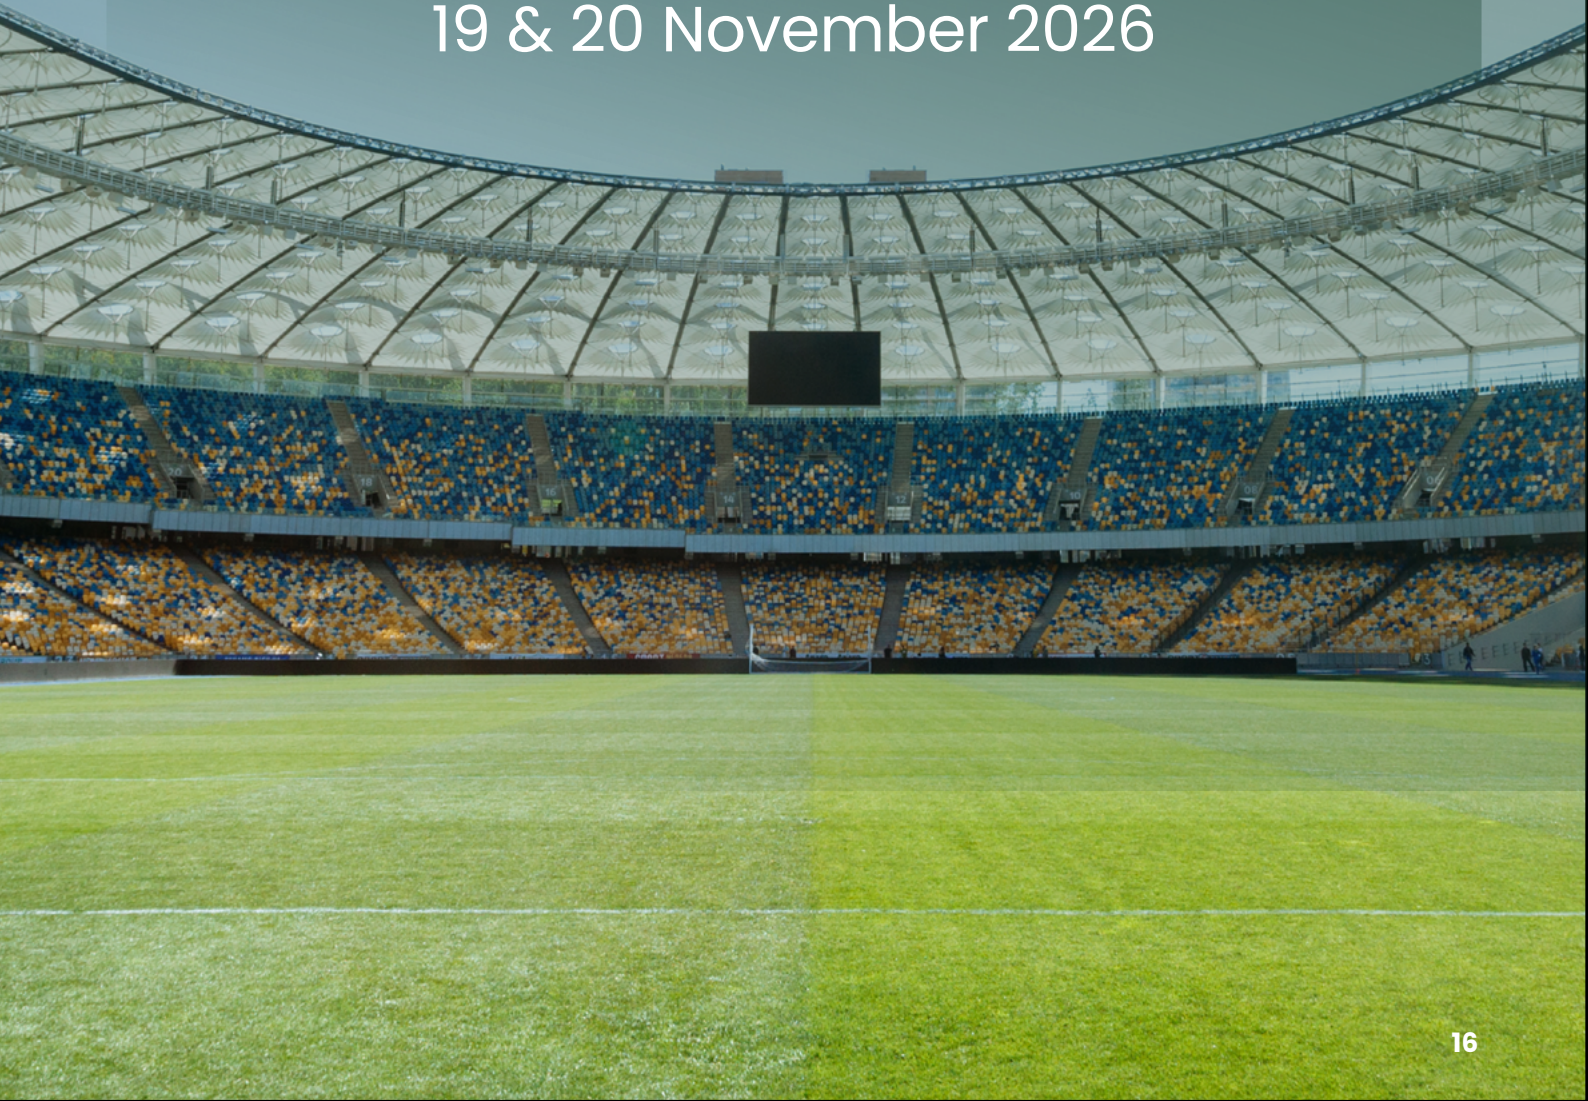

Secretary, BAUS Section of Functional & Reconstructive Urology

# BAUS

Section of  
Oncology Meeting

Edgbaston Stadium  
19 & 20 November 2026

# BAUS SECTION OF ONCOLOGY

**The BAUS Section of Oncology is delighted to welcome you to London for BAUS 2026 for an exceptional and thought-provoking meeting. The Oncology program will traverse the full landscape of uro-oncology - from operating theatre to MDT room, from laboratory bench to commissioning table - engaging some of the most important and contested questions facing our specialty today, with lot of emphasis on video based presentations, practical scenarios, solutions and a celebration of surgical skills on modern day tools.**

This year's programme reflects both the remarkable pace of change in uro-oncology and the enduring complexity of translating innovation into practice. We are honoured to be joined by an outstanding international faculty, including Murugesan Manoharan, Jaime Landman and Jose A. Karam from the United States, Arnulf Stenzl from Germany and Sanjai Addla from India, whose contributions across surgical techniques & developments in the field are unrivalled. Their presence, alongside a superb cadre of UK uro-oncologists, ensures that every session will carry genuine intellectual weight.

The Uro-Oncology program opens on Monday, 15 June, with a session that confronts the realities of our specialty with refreshing candour. Eva Bolton, Ravi Barod and Derek Rosario will present nightmare scenarios, while Suresh Venugopal will moderate with the international panel and audience for best approaches.

The video-based presentations on complications by Murugesan Manoharan, Anthony Koupparis and Gokul KandaSwamy will ground the discussion in surgical truth, reach and some success stories. Liz Bright will talk about their honest experiences in MDT streamlining and Sanjai Addla will give a challenging talk on optimal care for cancer survivors. It is a session designed not to impress but to teach.

On Tuesday, 16 June, the bladder cancer session will be an innovative hybrid session of a futuristic MDT, highlighting the most transformative period in a generation in this field with experts like Param

Mariappan, Niyati Lobo, Murugesan Manoharan, Helena Burden, Sanjai Addla, and Arnulf Stenzl. With Consultant Oncologist Alison Birtle, joining this panel it will be a truly expert multidisciplinary panel, which interrogates whether the convergence of precision diagnostics, immunotherapy and organ-preserving strategies genuinely justifies a paradigm shift, and whether the NHS infrastructure, workforce and commissioning frameworks are ready to support it.

The afternoon turns to renal and upper tract oncology, with Sarika Nalagatla exploring the burden of diagnosing small renal masses while Jaime Landman addresses its mismanagements. Alex Laird will guide us through individualised approaches to UTUC and Prasad Patki the role of metastasis-directed surgery in this era. Finally, Jose Karam will explore the next-generation risk stratification tools in renal cancer.

The day concludes with a focused session on testicular and penile cancers, where EMPAST audit data will be presented by Omar El-Taji and Vishwanath Hanchanale, who will also enlighten us on Robotic RPLND.

Majid Shabbir will give practical tips for unusual testicular lesions and finally Vivekanandan Kumar will highlight the role of robotic node dissection for penile cancer.

Wednesday, 17 June brings the prostate cancer session in the morning that addresses the screening debate from UK, European and American perspectives by William Cross, Arnulf Stenzl and Murugesan Manoharan respectively. Caroline Moore will dissect the present day prostate cancer risk stratifications, followed by Hashim Ahmed examining focal therapy, its standards and evolving role. Finally, Prasanna Sooriakumaran on the contemporary surgical role in oligometastatic disease.

## BAUS Section of Oncology Continued

If this feast hasn't met your expectations, the final semi-live video session will be a cherry on the cake as more videos from experts showcases technical excellence across the breadth of uro-oncological surgery to inspire and the reach of technical expertise in the field - from neobladder formation by Murugesan Manoharan, preserving bladder neck in any situation by Bhavan Rai, innovations across different robotic platforms within Urology by Prokar Dasgupta, precision nerve sparing during cystectomy by Arnulf Stenzl, improving continence following prostatectomy by Philip Charlesworth, and robotic caval thrombus removal by Salah Al-Buheissi.

We are deeply grateful to every speaker, chair and organiser who has made this programme possible, and we warmly encourage each delegate to engage fully, challenge freely, and enjoy BAUS 2026 in London.

**Vishwanath Hanchanale**  
Chair, BAUS Section of Oncology

**Gokul KandaSwamy**  
Secretary, BAUS Section of Oncology

**Bhavan Rai**  
Vice Chair, BAUS Section of Oncology

of Urological Surgeons

# BAUS BSoT Section Meeting

5 & 6 November 2026  
The Grand, Brighton

# BAUS SECTION OF SAS AND TRUST UROLOGISTS

**The BAUS Section of SAS and Trust Urologists (SSTU) is delighted to host two dedicated sessions and a specialist workshop at BAUS 2026, taking place in London from 15-17 June. This year's programme continues our commitment to supporting SAS and Trust Urologists by addressing key professional support, wellbeing, and career progression pathways.**

On Monday, our session will focus on empowering SAS and Trust Urologists through professional support from BAUS SSTU and national organisations. We will define the various roles within our community (Speciality doctor, Associate Specialist, Locally Employed Doctor, Clinical Fellow, etc), explore opportunities beyond the traditional "service job," and review progression within the NHS specialist grade. Importantly, the session will also highlight the vital topic of workplace wellbeing for SAS and Locally Employed Doctors (LEDs).

On Tuesday, we will explore career progression and overcoming challenges, featuring insights into the Severn Portfolio Pathway rotation and the Hampshire Hospitals "Single-Spine" pathway.

Colleagues will share inspiring personal journeys, including lessons learned while navigating different pathways toward the specialist register and the role of fellowships for doctors in non-training pathways.

Following the immense success of previous years, we are pleased to announce the return of the "Navigating the Portfolio Pathway: A Roadmap to Success" workshop on Wednesday. This session offers colleagues detailed guidance on curriculum requirements, evidence collection, and mastering the ISCP portfolio, culminating in a panel discussion with expert insights from the Urology SAC to help ensure a stronger application.

Through these sessions, SSTU aims to provide SAS and Trust Urologists with practical insights, peer support, and the latest updates to enhance career opportunities and professional development.

**Adham Ahmed**  
Chair, BAUS Section of SAS  
and Trust Urologists

**Hosam Noweir**  
Secretary, BAUS Section of  
SAS and Trust Urologists

**Shekhar Marathe**  
Vice Chair, BAUS Section of SAS  
and Trust Urologists

# BRITISH UROLOGY RESEARCHERS IN SURGICAL TRAINING (BURST)

We are delighted to welcome you to #BURStatBAUS this year. We have something for everyone on every day of the conference.

## DAY 1

### Change My Mind:

The Gap Between Evidence and Experience. Four provocative statements. Four speakers willing to defend the seemingly indefensible. We challenge you to separate dogma from doctrine as our experts argue for positions that might just change your practice. Bring your questions, bring your opinions, and prepare to have your assumptions challenged.

## DAY 2

### The Research X-Factor returns in collaboration with The Urology Foundation.

Get your buzzers ready as you hear from contestants across the country compete for your votes to take their innovative research ideas to the next level. Who will win the Judges' Prize and the People's Choice Award?

## DAY 3

### Is the AI bubble about to BURST?

Artificial intelligence has infiltrated every corner of medicine, from clinic letters to MDT decisions. But is it all hype, or is there substance behind the headlines? Join us for two lively debates as experts go head-to-head on whether AI should be used in research and clinical practice. Expect controversy, audience voting, and practical takeaways you can bring back to your department.

**Arjun Nathan**  
Co-Chair, BURST

**Aqua Asif**  
Co-Vice-Chair, BURST

# MONDAY 15TH JUNE 2026

| TIME        | LOCATION       | SESSION TYPE |

|-------------|-----------------|--------------|
| 14.15-15.45 | CATHERINE LEWIS | ONCOLOGY     |

## COMPLICATIONS, SURVIVORSHIP AND NIGHTMARES IN URO-ONCOLOGY

**14.15-14.55** Part 1: Nightmares in Uro-Oncology

Moderator: Suresh Venugopal

Panel: Jose A. Karam, MD Anderson Cancer Centre and Associate Secretary, AUA,

Murugesan Manoharan, Professor and Chairman, Miami Cancer Institute,

Prof. Arnulf Stenzl, MD Secretary General, European Association of Urology (EAU), Senior Professor and Consultant, University of Tuebingen

Prostate Cancer: Derek Rosario, Royal Hallamshire Hospital, Sheffield

Urothelial Cancer: Eva Bolton, Charing Cross Hospital

Renal Cancer: Ravi Barod, Royal Free Hospital

### Part 2: Complications – stories in motion (video based)

Chairs: Ben Lamb, The Royal London Hospital, Tharani Nitkunan, Epsom General Hospital, Shiv Pandian, North Middlesex Hospital

**14.55-14.56** Introduction

**14.56-15.08** Surgical approaches to reduce stomal complications: Murugesan Manoharan, Professor and Chairman, Miami Cancer Institute

**15.08-15.20** Robotic Surgery beyond boundaries – Anthony Koupparis, Southmead Hospital, Bristol

**15.20-15.25** Primary repair of VUA dehiscence – video based – Gokul KandaSwamy, Morrision Hospital, Swansea

### Part 3: Survivorship & MDT

**15.25-15.35** Pelvic cancer follow up post curative treatment – frugal vs switching gears vs guidelines: Sanjai Addla, Senior Consultant Urooncologist, Apollo Hospitals, Hyderabad, India

**15.35-15.45** Implementing MDT streamlining – real world experience: Elizabeth Bright, Royal Cornwall Hospital, Truro

### Conclusion

| TIME        | LOCATION    | SESSION TYPE |
|-------------|-------------|--------------|
| 14.15-15.45 | JOHN BLANDY | ENDOUROLOGY  |

## TAKING YOUR STONE SERVICE TO THE NEXT LEVEL

Chairs: Dhaval Bodiwala, Nottingham City Hospital, Rono Mukherjee, Salford Royal Hospital

**14.15-14.30** MDT optimisation: Su-Min Lee, Southmead Hospital, Bristol

**14.30-14.45** The case for a CNS: Stella Roushias, Royal Gwent Hospital

**14.45-15.00** Equipment: James Brewin, Salisbury District Hospital

**15.00-15.15** Urology Area Networks: Will Finch, Norfolk and Norwich University Hospital

**15.15-15.30** Q&A

**15.30-15.45** The experiences of setting up a service from scratch in a low resource setting: Orgeness Mbwambo, KCMC Hospital and University

Monday 15th June 2026

| TIME   | LOCATION   | SESSION TYPE |
|--|--|--------------|
| <b>14.15-15.45</b>   | <b>JOHN ANDERSON</b>   | <b>FRU</b>   |

ONCOLOGY

## BLADDER CANCER MANAGEMENT – PARADIGM SHIFT INTO THE NEW ERA

Moderator: Gokul KandaSwamy, Morriston Hospital, Swansea

Panel: Param Mariappan, Western General Hospital, Edinburgh, Niyati Lobo, Addenbrooke's Hospital, Cambridge, Murugesan Manoharan, Professor and Chairman, Miami Cancer Institute, Helena Burden, Southmead Hospital, Bristol, Professor Alison J Birtle FRCP FRCR MD DipLCM Honorary Clinical Professor & Consultant Oncologist, Prof Sanjai Addla, Senior Consultant Urooncologist at Apollo Hospitals, Hyderabad, India, Prof. Arnulf Stenzl, MD, Secretary General, European Association of Urology (EAU), Senior Professor and Consultant, University of Tuebingen

Bladder cancer management is rapidly evolving, driven by precision diagnostics, immunotherapy, novel systemic agents and organ-preserving strategies. Thanks to this multi-dimensional changes, over the next 2-5 years, treatment algorithms may look fundamentally different.

This expert multidisciplinary panel will discuss how the emerging evidence truly justifies a paradigm shift, whether our systems and workforce are prepared, how we follow this to adapt and what must change now in infrastructure, training, commissioning, and data governance to deliver the bladder cancer pathway of the future

10.45-11.45

JOHN BLANDY

ENDOUROLOGY

## AI IN ENDOUROLOGY - THE FUTURE IS NOW

Chairs: Subu Subramonian, Queen Elizabeth Hospital Birmingham

Marie Edison, Chelsea & Westminster Hospital

## JCU GUEST LECTURE ENDUROLOGY IN THE FUTURE: ROBOTICS, SCOPES, INTELLIGENT FLUID MANAGEMENT AND THE NEXT ERA OF STONE SURGERY

Chairs: Bhaskar Somani, University Hospital Southampton,

Ian Pearce, Manchester Royal Infirmary and President of BAUS

Clare-Ellen McNaught, President, Royal College of Surgeons of Edinburgh

Keynote: Steffi Yuen, Li Shu Fan International Professor, Royal College of Surgeons of Edinburgh

Wednesday 17th June 2026

| TIME        | LOCATION       | SESSION TYPE  |
|-------------|----------------|---------------|
| 14.00-14.30 | TERENCE MILLIN | GUEST LECTURE |

**TUF GUEST LECTURE****BUILDING A CONSENSUS GUIDANCE IN A RESEARCH VOID: CHRONIC URINARY RETENTION IN WOMEN AND THE PARADIGM SHIFT IN CARE**

Chair: Mary Garthwaite, TUF Chair and former Consultant Urological Surgeon

Panel: Dani Coombe, CEO Fowler's Syndrome UK,

Prof. Jalesh Panicker, Consultant Neurologist,

Helen Simpson, Consultant Urological Surgeon

This session highlights the key steps in the process of redefining the care pathway of chronic urinary retention in women through the CURATE project and the importance of input from multiple stakeholders. It includes key learning points from the inaugural Fowler's Syndrome Community Conference, held in London in February. This session is a must for anyone looking to drive improvements in care and outcomes in other historically neglected areas of Urology. It explores how to advance care for patients where there is currently a paucity of high quality research to underpin the management of their condition.

- 14.30-14.42** Review of evidence: Neha Sihra, St Bartholomew's Hospital
- 14.42-14.54** Robotic VVF Repair: Sachin Malde, Guy's & Thomas's Hospital
- 14.54-15.06** Ureteric reimplantation post pelvic surgery injury:  
Nikita Bhatt, Freeman Hospital, Newcastle
- 15.06-15.18** Mesh removal: Benoit Peyronnet
- 15.18-15.30** Benign Cystectomy: Arjun Nambiar, Freeman Hospital, Newcastle
- 15.30-15.42** Training in robotics for FRU: Rachel Barratt, University College Hospital, London
- 15.42-15.54** Robotic platforms. Which system for which subspecialty?:  
Ben Challacombe, Guy's & Thomas's Hospital
- 15.54-16.00** Question/discussion

# GUEST SPEAKER BIOGRAPHIES

## PETE REED

OBE

**3x Olympic Rowing Champion, now full-time wheel chair user after a spinal stroke in 2019**

With three gold medals in rowing at three consecutive Olympic Games (2008 / 2012 / 2016), Pete secured his first of five World Championship titles less than four years after starting the sport. In his 17-year rowing career, he also secured two Oxford Blues and is one of only 14 Team GB Olympians to stay at the top of his sport for so long.

A serving Royal Navy officer since 1999, Pete retired from rowing in 2018 to resume public service at sea. In 2019, he had a spinal stroke resulting in full-time wheelchair use. Pete has since used his military training and Olympic experience to get the best from his changed life circumstances and help others to do the same. He speaks openly about his unique insight into overcoming adversity and trauma having learned that resilience is not a given trait, but is trainable for everyone.

In 2022, he left active service in the Royal Navy and was given the rare honour of being made an Honorary Captain. Pete has used his time since to promote for disability rights and access including successfully campaigning for Transport for London to add green wheelchair users to traffic lights.

Pete's greatest personal passions are his wife Jeannie, son Freddie, photography, travel and anything active!

## Guest Speaker Biographies

### PROFESSOR SIR MIKE RICHARDS

CBE MD FRCP

Mike was an academic cancer physician specialising largely in breast cancer before being appointed as Professor of Palliative Medicine at Guy's and St Thomas' in 1995.

Since retiring in 2017 he has led reviews of screening and diagnostic services in the NHS on behalf of government and NHS England, and has subsequently advised NHS England on its implementation, including the establishment of around 170 community diagnostic centres. He chairs the UK National Screening Committee, which advises all four countries on screening programmes for cancer and other conditions. In 2025 he was asked to chair an independent commission on palliative and end of life care.

In autumn 2024 he conducted a review of the Single Assessment Framework and its implementation for CQC. He was subsequently appointed as Chair of CQC in April 2025. He will stand down at the end of May 2026 to enable a new chair to appoint a new chief executive.

If he has any spare time, he enjoys hill walking in the Yorkshire Dales and Scotland.

## Guest Speaker Biographies

### ANDREW J. HUNG

MD

Dr. Andrew Hung is widely credited as one of the founders of the field of surgical data science — a discipline he has helped shape over two decades through pioneering research at the intersection of artificial intelligence, robotics, and surgical education.

His work has fundamentally changed how the field thinks about surgical training and performance assessment, replacing subjective evaluation with objective, data-driven methods that are now used in training programs around the world.

Dr. Hung received his Bachelor of Science degree with honors from Yale University and completed his medical education at the Weill Medical College of Cornell University with honors in research. He completed his urology residency and a fellowship in advanced laparoscopy and robotics at the University of Southern California, where he subsequently joined the faculty and attained tenure over nine years of service. In 2023, he joined the Department of Urology at Cedars-Sinai Medical Center as Vice Chair for Academic Development.

Supported by over \$10 million in funding from the National Institutes of Health, Dr. Hung has become one of the foremost innovators in automated performance metrics for robotic surgery. In collaboration with AI scientists at Caltech and Cedars-Sinai, his laboratory has developed deep learning systems capable of evaluating surgical skill with expert-level precision and predicting patient-reported outcomes — advances that are redefining the standard of surgical training and assessment.

Dr. Hung has authored over 200 peer-reviewed publications in leading journals including Nature Biomedical Engineering, JAMA Surgery, and the Journal of Urology. He served as the inaugural Consulting Editor on Artificial Intelligence for the British Journal of Urology International, and currently serves on the National Institutes of Health study section on Image-guided Interventions and Surgery and the United Kingdom Responsible AI Advisory Board.

In 2026, Dr. Hung was inducted into the American Society of Clinical Investigators — one of the most prestigious honor societies in academic medicine, recognizing physician-scientists who have made transformative contributions to human health through their research.

## Guest Speaker Biographies

### PROF STEFFI KAR KEI YUEN

Prof. Steffi Yuen graduated from The University of Hong Kong as a Nesta and John Gray Medalist and has completed her fellowship training at Queen Mary Hospital. Currently she works in New Territories East Cluster, Prof Steffi Yuen's main area of interest encompasses endourology and minimally invasive surgery.

Prof Steffi Yuen is the recipient of SIU Innovator Award 2025, Société Internationale d'Urologie (SIU). Globally engaged, Prof Yuen holds many roles in international organizations and has been appointed as the inaugural Li Shu Fan International Professor by the Royal College of Surgeons of Edinburgh for her global collaborative research on the latest cutting-edge technology in endourology. She serves as an Associate Member in European Association of Urology (EAU) Endourology Research & Publications Working group and is also appointed as the Vice-chairperson of International Alliance of Urolithiasis (IAU) Youth committee.

She is a certified proctor for iTIND, Urolift, Rezum, Aquablation for benign prostatic hyperplasia and regular instructor for Asian Urological Surgery Training & Education (AUSTEG). She is globally recognized her significant contribution to the innovation, education and international collaboration in the field of urology, with European Association of Urology awarding her the Best Researcher of the Year 2025 in Endourology.

- Recipient of Best Research of the Year 2025 in EAU International Conference in Endourology (ICE)
- Recipient of SIU Innovator Award 2025, Société Internationale d'Urologie (SIU)
- Associate Member, Working group of Research & Publications, EAU Section of Endourology
- Vice-chairperson, Youth committee, International Alliance of Urolithiasis (IAU)
- Board of Director (Corporate Development), Société Internationale d'Urologie (SIU)
- Associate Editor, SIU Journal
- Editorial board, World Journal of Urology
- Committee Member, Asian Urological Surgery Training & Education (AUSTEG)
- Associate Member, Asian Urological Society of Endoluminal Surgery & Technology (AUSET)

| 08.00-09.00 | CATHERINE LEWIS | EPOSTER      |

### 3 **BLADDER CANCER: MUSCLE INVASIVE/NON-MUSCLE INVASIVE**

Chairs: Nnaemeka Eli, Freeman Hospital, Newcastle & Malek Gaashan, Leicester General Hospital

#### P3-1 **Organisational and clinical practice factors associated with early recurrence after TURBT surgery: an analysis of the RESECT study**

Ms Aqua Asif<sup>1,2</sup>, Dr Steven MacLennan<sup>3</sup>, Ms Nikita R Bhatt<sup>2,4</sup>, Mr Keiran D Clement<sup>2,5</sup>, Ms Eleanor F Zimmermann<sup>2,6</sup>, Mr Sinan Khadhour<sup>2,7</sup>, Prof Paramananthan Mariappan<sup>2,8,9</sup>, Prof Veeru Kasivisvanathan<sup>1,2</sup>, Mr Kevin M Gallagher<sup>2,8,9</sup>, on behalf of the BURST-RESECT Global Study Group<sup>1,2</sup>

<sup>1</sup>University College London, London, United Kingdom, <sup>2</sup>British Urology Researchers in Surgical Training (BURST), London, United Kingdom, <sup>3</sup>University of Aberdeen, Aberdeen, United Kingdom, <sup>4</sup>St Vincent's University Hospital, Dublin, Ireland, <sup>5</sup>NHS Tayside, Dundee, United Kingdom, <sup>6</sup>North Bristol NHS Trust, Bristol, United Kingdom, <sup>7</sup>St Andrews University, St Andrews, United Kingdom, <sup>8</sup>University of Edinburgh, Edinburgh, United Kingdom, <sup>9</sup>Western General Hospital Edinburgh, Edinburgh, United Kingdom

#### P3-2 **Real-world evaluation the Galeas Urinary Biomarker for Surveillance in intermediate and high-risk NMIBC; experience from a UK TULA clinic with histopathological correlation**

Mrs Nidhi Kapadia<sup>1</sup>, Ms Helma Kolarickal<sup>1</sup>, Mr Sachin Agrawal<sup>1</sup>

<sup>1</sup>Ashford And St Peter's Hospitals, Chertsey, United Kingdom

#### P3-3 **Immediate detrusor muscle status at time of primary transurethral resection of bladder tumour: a prospective, paired, cohort feasibility study using fluorescence confocal microscopy (IBI-LaserComplete)**

Mr Martin Connor<sup>1</sup>, Dr Archana Gopalakrishnan<sup>1</sup>, Prof Rakesh Heer<sup>2</sup>, Ms Eva Bolton<sup>2</sup>, Mr David Hrouda<sup>2</sup>, Dr Anna Silvanto<sup>3</sup>, Dr Andrew Smith<sup>2</sup>, Prof Mona El-Bahrawy<sup>1</sup>, Mr Mathias Winkler<sup>1</sup>, IBI-LaserComplete Trial Investigators<sup>1</sup>

<sup>1</sup>Imperial College London, London, United Kingdom, <sup>2</sup>Imperial College Healthcare NHS Trust, London, United Kingdom, <sup>3</sup>University College London Hospitals NHS Foundation Trust, London, United Kingdom

#### P3-4 **Impact of prior pelvic radiotherapy on perioperative safety and functional outcomes of robot-assisted cystectomy and intracorporeal ileal conduit diversion: A propensity-score matched analysis**

Mr Youssef Ibrahim<sup>1</sup>, Miss Yasmin Abughanem, Miss Elsie Mensah, Dr Mohammed Gad, Prof Shamim Khan, Mr Ramesh Thurairaja

<sup>1</sup>Guys Hospital, London, United Kingdom

Tuesday 16 June 2026

- P3-5 Cystoscopic RADA16 (PuraStat®) as an adjunct and salvage therapy for refractory radiation cystitis: Expanded prospective outcomes**  
Mr Mohamed Gad<sup>1</sup>, Mr John OKelly, Mr Youssef Ibrahim, Miss Elsie Mensah, Prof Muhammad Shamim Khan, Miss Yasmin Abu Ghanem, Mr Ramesh Thuraiaraja  
<sup>1</sup>Guys Hospital, London, United Kingdom
- P3-6 Frailty predicts all-cause mortality in patients with bladder cancer and outperforms WHO performance status**  
Miss Charlotte Simms, Mr Angus Hall, Mr Mohantha Dooldeniya  
<sup>1</sup>Pinderfields Hospital, Wakefield, United Kingdom
- P3-7 The impact of socioeconomic status in influencing stage at presentation and overall survival in bladder cancer: A West of Scotland experience**  
Mr Jamie Leask<sup>1</sup>, Mr Ibrahim Ibrahim<sup>1</sup>, Mr Blair Wilson<sup>1</sup>, Ms Jane Hendry<sup>1</sup>, Mr Abdullah Zreik<sup>1</sup>  
<sup>1</sup>Queen Elizabeth University Hospital, Glasgow, United Kingdom
- P3-8 Beyond the guidelines: A real-world assessment of NMIBC surveillance in NHS Scotland and potential cost-effectiveness of the Epicheck biomarker**  
Dr Jasmin Hart Brooke<sup>1,3</sup>, Dr Delphine Chabut<sup>2</sup>, Mr Simon Verdonck<sup>2</sup>, Professor Paramanathan Mariappan<sup>1,4</sup>  
<sup>1</sup>Edinburgh Bladder Cancer Surgery (EBCS), The University of Edinburgh, Western General Hospital, Edinburgh, United Kingdom, <sup>2</sup>Menarini Diagnostics GmbH, Basel, Switzerland, <sup>3</sup>Edinburgh Medical School, The University of Edinburgh, Edinburgh, United Kingdom, <sup>4</sup>The University of Edinburgh, Edinburgh, United Kingdom
- P3-9 Moving the dial on haematuria investigation – a multicentre real-world evaluation of the Haematuria Cancer Risk Score**  
Mr Tom Malik<sup>1</sup>, Mr Jonathan Denfhy<sup>1</sup>, Dr Hpone Theinka Lin<sup>1</sup>, Dr Lubna Mohammed<sup>1</sup>, Miss Kirhana Babureddy<sup>2</sup>, Miss Amber Pankhurst<sup>2</sup>, Miss Amina Buba<sup>3</sup>, Miss Jessica Head<sup>4</sup>, Ms Sian Dudley<sup>5</sup>, Professor Jonathan Aning, et al.  
<sup>1</sup>Bristol Urological Institute, Bristol, United Kingdom, <sup>2</sup>Gloucestershire Hospitals NHS Foundation Trust, Cheltenham, United Kingdom, <sup>3</sup>Royal United Hospitals NHS Foundation Trust, Bath, United Kingdom, <sup>4</sup>Somerset Foundation Trust, Taunton, United Kingdom, <sup>5</sup>Great Western Hospitals NHS Foundation Trust, Swindon, United Kingdom
- P3-10 Contemporary practice patterns in female radical cystectomy: Results of a UK and Ireland survey**  
Miss Elizabeth Day<sup>2</sup>, Mr Francesco Pio Bizzarri<sup>1</sup>, Ms Rebecca Martin<sup>3</sup>, Mr Adam Nelson<sup>1</sup>, Miss Alexandra Colquhoun<sup>1</sup>, Miss Helena Burden<sup>4</sup>, Mr Benjamin Ayres<sup>5</sup>, Mr Vishwanath Hanchanale<sup>6</sup>, Mr James Douglas<sup>7</sup>, Professor Jonathan Aning<sup>4</sup>, Miss Niyati Lobo<sup>1</sup>  
<sup>1</sup>Cambridge University Hospitals NHS Foundation Trust, Cambridge, United Kingdom, <sup>2</sup>NHS Ayrshire and Arran, Scotland, <sup>3</sup>Royal Marsden NHS Foundation Trust, London, UK, <sup>4</sup>Bristol Urological Institute, Bristol, UK, <sup>5</sup>St Georges University Hospitals NHS Foundation Trust, UK, <sup>6</sup>Royal Liverpool and Broadgreen University Hospital NHS Trust, UK, <sup>7</sup>University Hospital Southampton NHS Foundation Trust, Southampton, UK

## 4 FUNCTIONAL UROLOGY & NEURO-UROLOGY BLADDER DYSFUNCTION AND RECONSTRUCTION 1

Chairs: Bushra Abdelqader, St George's Hospital, London & Arjun Nambiar, Freeman Hospital, Newcastle

### P4–1 Clinical Outcomes of Multidisciplinary Care for Recurrent Urinary Tract Infections: Four-Year Data from a Complex UTI Clinic

Miss Hira Bakhtiar Khan<sup>1,2</sup>, Dr Anandana Bhattia<sup>1</sup>, Miss Pragnitha Chitteti<sup>2,3</sup>,  
Miss Sindhu Sankaran<sup>1,2</sup>, Jayne Morris-Laverick<sup>1</sup>, Stephanie Bezemer<sup>1</sup>, Mr George Hanna<sup>1</sup>,  
Mr Ahmed Ghonaimy<sup>1</sup>, Dr Csaba Marodi<sup>1</sup>, Miss Mehwash Nadeem<sup>1,2</sup>

<sup>1</sup>James Cook University Hospital, Middlesbrough, United Kingdom, <sup>2</sup>Teeside Urology Research Alliance (TURA), Middlesbrough, United Kingdom, <sup>3</sup>Royal Salford Hospital, Middlesbrough, United Kingdom

### P4–2 Clinical Outcomes and Differential Organism Response to Intravesical Aminoglycoside Therapy in Adults with Recurrent Urinary Tract Infections

Miss Sindhu Sankaran<sup>1,2</sup>, Miss Pragnitha Chitteti<sup>1,2</sup>, Miss Hira Bakhtiar Khan<sup>1,2</sup>, Dr Csaba Marodi<sup>1</sup>,  
Miss Jayne Morris<sup>1</sup>, Miss Stephanie Bezemer<sup>1</sup>, Miss Mehwash Nadeem<sup>1,2</sup>

<sup>1</sup>James Cook University Hospital, Middlesbrough, United Kingdom, <sup>2</sup>Teeside Urology research Alliance, Middlesbrough, United Kingdom

### P4–3 Clinical Effectiveness of a Double-Dose MV140 Regimen in Recurrent Urinary Tract Infections Associated with Neuropathic Bladder.

Mr Sagar Kanabar<sup>1</sup>, Mr Stephen Foley, Mr Bob Yang

<sup>1</sup>Royal Berkshire Hospital, Reading, United Kingdom

### P4–4 The Natural History of Continence and Patient Satisfaction after Mesh Removal: a Tertiary-Centre Experience

Mr Ioannis Loufopoulos<sup>1</sup>, Mr Keith Pace<sup>2</sup>, Mr Loai Alqahtani<sup>2</sup>, Mr Kapriniotis Konstantinos<sup>2</sup>,  
Miss Helena Gresty<sup>2</sup>, Mrs Tamsin Greenwell<sup>2</sup>, Mr Jeremy Ockrim<sup>2</sup>

<sup>1</sup>Royal Free Hospital, London, United Kingdom, <sup>2</sup>University College London Hospitals, London, United Kingdom

### P4–5 Long-term pilot assessment of Alluzience botulinum toxin A in patients with Botox-refractory detrusor overactivity

Mr John Piedad<sup>1</sup>, Mr Steve Foley<sup>2</sup>, Mr Bob Yang<sup>2</sup>

<sup>1</sup>Hereford County Hospital/Royal Berkshire Hospital, Hereford/Reading, United Kingdom,

<sup>2</sup>Royal Berkshire Hospital, Reading, United Kingdom

### P4–6 Long term outcomes of sacral neuromodulation in patients with psychiatric disorders

Mr Stefanos Agiotakis<sup>1</sup>, Mr Anastasios Natsos<sup>1</sup>, Ms Saddaf Hina<sup>1</sup>, Ms Paraskeve Granitsiotis<sup>1</sup>,  
Mr James Blackmur<sup>1</sup>

<sup>1</sup>Western General Hospital, Edinburgh, United Kingdom

Tuesday 16 June 2026

**P4-6**

**Long term outcomes of sacral neuromodulation in patients with psychiatric disorders**

Mr Stefanos Agiotakis<sup>1</sup>, Mr Anastasios Natsos<sup>1</sup>, Ms Saddaf Hina<sup>1</sup>, Ms Paraskeve Granitsiotis<sup>1</sup>, Mr James Blackmur<sup>1</sup>

<sup>1</sup>Western General Hospital, Edinburgh, United Kingdom

**P4-7**

**Long-term outcomes of urethral diverticulectomy in women:  
A 20-year single-centre review**

Miss Amna Butt<sup>1</sup>, Miss Amna Hashmi, Miss Nuseyba Sheikh

<sup>1</sup>University College Hospital, London, United Kingdom

**P4-8**

**Outcomes of Daycase Artificial Urinary Sphincter Placement in Men:  
A Tertiary Centre Experience**

Ms Nikita Bhatt<sup>1</sup>, Eva Browne<sup>2</sup>, Victoria Lavin<sup>2</sup>, Jonathan Barclay<sup>2</sup>, Christopher Harding<sup>2</sup>, Arjun Nambiar<sup>2</sup>

<sup>1</sup>St Vincent's University Hospital, Dublin, Ireland, <sup>2</sup>Newcastle Hospitals NHS Foundation Trust, Newcastle, United Kingdom

**P4-9**

**The Australasian Pelvic Floor Procedure Registry:  
Maturing Data on Primary and Revision Procedure Characteristics and Outcomes**

Ms Rhiannon Whale<sup>1</sup>, Professor Susannah Ahern<sup>1</sup>, Dr Mohammad Amin Honardoost<sup>1</sup>, Dr Bayley Matthews<sup>1</sup>, Dr Ailsa Wilson Edwards<sup>2,3</sup>, Associate Professor Jessica Yin<sup>4</sup>

<sup>1</sup>Clinical Outcomes data Reporting and Research Program, Monash University, Melbourne, Australia, <sup>2</sup>Calvary North Adelaide Hospital, Adelaide, Australia, <sup>3</sup>Northern Adelaide Local Health Network, Adelaide, Australia, <sup>4</sup>Hollywood Medical Centre, Nedlands, Australia

**P4-10**

**Robotic Reconstructive Urologic Surgery: Multicenter outcomes of  
IURES Robotic Urology Special Interest Group**

Dr Ahmet Furkan Sarikaya<sup>1</sup>, Dr Mustafa Kırac<sup>2</sup>, Dr Fevzi BEDİR<sup>3</sup>, Dr Orçun ÇELİK<sup>4</sup>, Dr Giray ERGİN<sup>2</sup>, Dr Bahri GÖK<sup>5</sup>, Dr Serdar AYDIN<sup>6</sup>, Dr Ahmet GÜRBÜZ<sup>7</sup>, Dr Tayfun OKTAR<sup>7</sup>, Dr Kanan VALİYEV<sup>8</sup>, Dr Arif ÖZKAN<sup>9</sup>, Dr İbrahim Can AYKANAT<sup>10</sup>, Dr Tomislav Kuliš<sup>11</sup>, Dr Serdar MADENDERE<sup>12</sup>, Dr Barış ESEN<sup>7</sup>, Dr Emre HURİ<sup>8</sup>, Dr Mevlana Derya BALBAY<sup>12</sup>, Dr Abdullah Erdem CANDAN<sup>13</sup>

<sup>1</sup>Viransehir State Hospital, Sanliurfa, Türkiye, <sup>2</sup>Yüksek İhtisas University, Koru Ankara Hospital, Ankara, Türkiye, <sup>3</sup>Erzurum Regional Training and Research Hospital, Department of Urology, Erzurum, Türkiye, <sup>4</sup>Bazekol Çiğli Hospital, Department of Urology, İzmir, Türkiye, <sup>5</sup>Lokman Hekim University, Department of Urology, Ankara, Türkiye, <sup>6</sup>Koç University, Faculty of Medicine, Department of Obstetrics and Gynecology, İstanbul, Türkiye, <sup>7</sup>Koç University, Faculty of Medicine, Department of Urology, İstanbul, Türkiye, <sup>8</sup>Hacettepe University, Faculty of Medicine, Department of Urology, Ankara, Türkiye, <sup>9</sup>Medicana Zincirlikuyu Hospital, İstanbul, Türkiye, <sup>10</sup>Balıkesir University, Faculty of Medicine, Department of Urology, Balıkesir, Türkiye, <sup>11</sup>Department of Urology, University Hospital Center Zagreb, Zagreb, Croatia, <sup>12</sup>VKV American Hospital, Department of Urology, İstanbul, Türkiye, <sup>13</sup>Koç University, Faculty of Medicine, Department of Urology, İstanbul, Türkiye & Director RMK AIMES Training Center, İstanbul, Türkiye

Tuesday 16 June 2026

| TIME        | LOCATION      | SESSION TYPE |

| 08.00-09.00 | JOHN ANDERSON | EPOSTER      |

## 5 ANDROLOGY 1

Chairs: Majid Shabbir, Guy's & Thomas's Hospital & Kuo Jong Ho, Good Hope Hospital, Sutton Coldfield

### P5-1 Patient-Reported Satisfaction Following Primary and Revision Inflatable Penile Prosthesis (IPP) Surgery: A Multicentre Analysis Using a Validated Instrument

Mr Abdullah Al-Mitwalli<sup>1</sup>, Dr H Bernie<sup>3</sup>, Dr E Abou Chawareb<sup>2</sup>, Dr M Hammad<sup>2</sup>, Mr A Di Giovanni<sup>1</sup>, Mr M Shah<sup>1</sup>, Dr L Amorim<sup>3</sup>, Dr T Pereira<sup>3</sup>, Dr Lai Lillian<sup>4</sup>, Ms N.B Liso<sup>5</sup>, Dr A Wan<sup>1</sup>, Dr M Gosalia<sup>1</sup>, Dr A Liaw<sup>4</sup>, Dr C Nelson<sup>5</sup>, Dr J.M Flores<sup>5</sup>, Mr W.G Lee<sup>1</sup>, Ms P Sangster<sup>1</sup>, Dr F Yafi<sup>2</sup>, Prof J.P Mulhall<sup>5</sup>, Prof David Ralph<sup>1</sup>

<sup>1</sup>University College London Hospitals, London, United Kingdom, <sup>2</sup>University of California, Irvine, United States of America, <sup>3</sup>Indiana University, United States of America, <sup>4</sup>Wayne State University, United States of America, <sup>5</sup>Memorial Sloan Kettering Cancer Center, United States of America

### P5-2 Plaque Incision and Grafting for Peyronie's Disease: 15-year experience and functional outcomes from a high-volume andrology centre

Dr Shiv Sarna<sup>1</sup>, Mr Karl Pang<sup>3</sup>, Prof David Ralph<sup>2</sup>, Prof Asif Muneer<sup>2</sup>, Mr Hussain Alnajjar<sup>2</sup>

<sup>1</sup>Norfolk And Norwich University Hospital, Norwich, United Kingdom, <sup>2</sup>University College London Hospital, London, United Kingdom, <sup>3</sup>Chelsea and Westminster Hospital, London, United Kingdom

### P5-3 Penile implants in prolonged ischemic priapism - malleable vs inflatable penile prosthesis insertion

Mr Abdullah Al-Mitwalli<sup>1</sup>, Mr C Kats-Summercorn<sup>2</sup>, Dr J Banerjee<sup>1</sup>, Mr M Shah<sup>1</sup>, Mr W.G. Lee<sup>1</sup>, Ms P Sangster<sup>1</sup>, Prof D Ralph<sup>1</sup>

<sup>1</sup>UCLH, London, United Kingdom, <sup>2</sup>Whittington Hospital, London, United Kingdom

### P5-4 The Impact of Body Mass Index on Survival After Penile Cancer Surgery

Dr Cesare Saitta<sup>1</sup>, Mr Mahmood Ziada<sup>1</sup>, Mr Adnan Ahmad<sup>1</sup>, Mr Paul Hadway<sup>1</sup>, Mr Raj Nigam<sup>1</sup>, Mr Varun Sahdev<sup>1</sup>, Mr Hussain Alnajjar<sup>1</sup>, Prof Asif Muneer<sup>1</sup>

<sup>1</sup>Male Genital Cancer Centre, Department of Andrology, University College London Hospitals, London, United Kingdom

### P5-5 A long learning curve demonstrates the complexity of gender - affirming inflatable penile prosthesis insertion

Mr Andrea Gobbo<sup>1</sup>, Mr Angelo di Giovanni<sup>1</sup>, Prof David John Ralph<sup>1</sup>, Mr Andrew Nim Christopher<sup>1</sup>, Mr Wai Gin Lee<sup>1</sup>

<sup>1</sup>New Victoria Hospital, London, United Kingdom

Tuesday 16 June 2026

**P5-6**

**Does Orchidopexy for Testicular Torsion Affect Long-Term Fertility Parameters in Males: A Systematic Review**

Mr Muhammad Shariq Rahemtoola<sup>1,2</sup>, Miss Avula Aishwarya Rao<sup>2</sup>, Mr Hassaan Aziz<sup>2</sup>, Mr Peter Grice<sup>2</sup>, Mr Mohamed Mubarak<sup>2</sup>, Miss Theodora Stasinou<sup>2</sup>, Professor Ian Pearce<sup>2</sup>, Professor Vaibhav Modgil<sup>2</sup>

<sup>1</sup>Royal Bolton Hospital, Greater Manchester, United Kingdom, <sup>2</sup>Manchester Andrology Research Collaborative, Manchester, England

**P5-7**

**Utility of preoperative imaging in penile fracture management**

Dr Bianca Chua<sup>1</sup>, Dr Mohammad Shah<sup>1</sup>, Dr Suraj Pinni<sup>1</sup>, Dr Mohannad Nasser<sup>1</sup>, Dr Angelo di Giovanni<sup>1</sup>, Dr Abdullah Al-Mitwalli<sup>1</sup>, Dr David Ralph<sup>1</sup>, Dr Conrad Von Stempel<sup>1</sup>, Dr Wai Gin Leel<sup>1</sup>

<sup>1</sup>University College London Hospital, London, United Kingdom

**P5-8**

**Off-label tamoxifen plus phosphodiesterase type 5 inhibitor improves outcomes in acute Peyronie's disease**

Mr Charles Katz-summercorn, Mr Abdullah Al-Mitwalli, Mr Mohammad Shah, Mr M Megson, Ms R. Fratangelo, Mr P. Shergill, Mr R. Shahzad, Mr A. Di Giovanni, Mr J. Zhang, Mr James Banerjee, Mr W.G. Lee, Professor D.J. Ralph, Professor S. Celtek

<sup>1</sup>Whittington Hospital, London, United Kingdom

**P5-9**

**Mapping the Tumour Immune Microenvironment in Metastatic Penile Cancer**

Mr Fowz Azhar<sup>1,2,3</sup>, Mrs Claire Hart<sup>1</sup>, Dr Mick Brown<sup>1</sup>, Dr Diego Sanchez-Martinez<sup>4,5</sup>, Dr Pedro Oliveira<sup>5</sup>, Mr Arie Parnham<sup>2</sup>, Professor Vijay K Sangar<sup>2</sup>, Professor Noel W Clarke<sup>1,2,3</sup>, Mr Ashwin Sachdeva<sup>1,2</sup>

<sup>1</sup>Genito Urinary Cancer Research Group, The University of Manchester, Manchester, United Kingdom, <sup>2</sup>Department of Surgery, The Christie NHS Foundation Trust, Manchester, United Kingdom, <sup>3</sup>Department of Urology, Salford Royal NHS Foundation Trust, Manchester, United Kingdom, <sup>4</sup>Cancer Research UK Manchester Institute, Manchester, United Kingdom, <sup>5</sup>Department of Pathology, The Christie NHS Foundation Trust, Manchester, United Kingdom

**P5-10**

**Patient satisfaction and outcomes following the insertion of a penile prosthesis in men aged ≥ 75**

Mr Jamie Lindsay<sup>1</sup>, Professor David Ralph<sup>1</sup>, Professor Asif Muneer<sup>1</sup>, Mr Hussain Alnajjar<sup>1</sup>

<sup>1</sup>Department of Andrology, University College London Hospitals NHS Foundation Trust, United Kingdom

Tuesday 16 June 2026

| TIME        | LOCATION  | SESSION TYPE |

## 11 ANDROLOGY 2

Chairs: Hussain Alnajjar, University College Hospital, London & Raveen Sandher, Guy's & Thomas's Hospital

- P11–1 Predictive Value of Flexible Cystoscopy for Late Stricture Recurrence Following Primary Bulbar Urethroplasty**  
 Mr Efstathios PAPAEFSTATHIOU<sup>1</sup>, [Mr Paul Anderson](#)<sup>1</sup>  
<sup>1</sup>Russells hall Hospital DGFT, UK, 53 Market St Kingswinford, United Kingdom
- P11–2 When Surgery Isn't an Option: Outcomes in Node-Positive Penile Squamous Cell Carcinoma (pSCC) Patients Unfit for Radical Inguinal Lymph Node Dissection (RILND).**  
[Miss Catherine McCollum](#)<sup>1</sup>, Miss Victoria Hyett<sup>4</sup>, Mr Cameron Boyle<sup>2</sup>, Miss Rebecca Huey<sup>2</sup>, Mr Ross Vint<sup>2</sup>, Mr Allan Johnston<sup>2</sup>, Mr Michael Fraser<sup>2</sup>, Mr David Hendry<sup>3</sup>, Mr Jonathan Salmond<sup>3</sup>, Mr Matthew Rewhorn<sup>2</sup>  
<sup>1</sup>Forth Valley Royal Hospital, Falkirk, United Kingdom, <sup>2</sup>Glasgow Royal Infirmary, Glasgow, United Kingdom, <sup>3</sup>Queen Elizabeth University Hospital, Glasgow, United Kingdom, <sup>4</sup>University Hospital Monklands, Lanarkshire, United Kingdom
- P11–3 High Body Mass Index Does Not Limit Semen Quality Improvement After Varicocele Repair**  
 Mr Albert Wong<sup>1</sup>, Ms Isabel Dighero<sup>1</sup>, Ms Anam Salim<sup>2</sup>, Professor David Ralph<sup>1</sup>, Dr Miles Walkden<sup>1</sup>, Ms Philippa Sangster<sup>1</sup>  
<sup>1</sup>University College London Hospital, London, United Kingdom, <sup>2</sup>University College London, London, United Kingdom
- P11–4 Lymph Node Ratio as an Independent Prognostic Factor for Overall Survival in Penile Cancer**  
[Dr Cesare Saitta](#)<sup>1</sup>, Mr Mahmoud Ziada<sup>1</sup>, Mr Adnan Ahmad<sup>1</sup>, Mr Paul Hadway<sup>1</sup>, Mr Raj Nigam<sup>1</sup>, Mr Varun Sahdev<sup>1</sup>, Mr Hussain Alnajjar<sup>1</sup>, Prof Asif Muneer<sup>1</sup>  
<sup>1</sup>Male Genital Cancer Centre, Department of Andrology, University College London Hospitals, London, United Kingdom
- P11–5 Human papillomavirus Status as a Prognostic Marker in Penile Cancer.**  
[Miss Catherine McCollum](#)<sup>1</sup>, Miss Victoria Hyett<sup>4</sup>, Mr Cameron Boyle<sup>2</sup>, Miss Rebecca Huey<sup>2</sup>, Mr Ross Vint<sup>2</sup>, Mr Allan Johnston<sup>2</sup>, Mr Michael Fraser<sup>2</sup>, Mr David Hendry<sup>3</sup>, Mr Jonathan Salmond<sup>3</sup>, Mr Matthew Rewhorn<sup>2</sup>  
<sup>1</sup>Forth Valley Royal Hospital, Falkirk, United Kingdom, <sup>2</sup>Glasgow Royal Infirmary, Glasgow, United Kingdom, <sup>3</sup>Queen Elizabeth University Hospital, Glasgow, United Kingdom, <sup>4</sup>University Hospital Monklands, Lanarkshire, United Kingdom

Tuesday 16 June 2026

- P11–6 Human papillomavirus Status as a Prognostic Marker in Penile Cancer.**  
Miss Catherine McCollum<sup>1</sup>, Miss Victoria Hyett<sup>4</sup>, Mr Cameron Boyle<sup>2</sup>, Miss Rebecca Huey<sup>2</sup>, Mr Ross Vint<sup>2</sup>, Mr Allan Johnston<sup>2</sup>, Mr Michael Fraser<sup>2</sup>, Mr David Hendry<sup>3</sup>, Mr Jonathan Salmond<sup>3</sup>, Mr Matthew Rewhorn<sup>2</sup>  
<sup>1</sup>Forth Valley Royal Hospital, Falkirk, United Kingdom, <sup>2</sup>Glasgow Royal Infirmary, Glasgow, United Kingdom, <sup>3</sup>Queen Elizabeth University Hospital, Glasgow, United Kingdom, <sup>4</sup>University Hospital Monklands, Lanarkshire, United Kingdom
- P11–7 Comparative Outcomes of T Shunt and Penoscrotal Decompression in Ischaemic Priapism**  
Mr Abdullah Al-Mitwalli<sup>1</sup>, Ms C Pozo<sup>1</sup>, Mr R Aldarrab<sup>1,2</sup>, Mr A Gobbo<sup>1</sup>, Mr J Lindsay<sup>1</sup>, Mr A Wong<sup>1</sup>, Dr A Wan<sup>1</sup>, Dr M Gosalia<sup>1</sup>, Mr M Shah<sup>1</sup>, Ms P Sangster<sup>1</sup>, Mr W.G Lee<sup>1</sup>, Prof David Ralph<sup>1</sup>  
<sup>1</sup>Uclh, London, United Kingdom, <sup>2</sup>King AbdulAziz Medical City, Riyadh, Saudi Arabia
- P11–8 Long term sexual and urinary outcomes following penile fracture repair**  
 Mr Charles Katz–summercorn<sup>1</sup>, Mr Abdullah Al-Mitwalli, Mr Mohammad Shah, Mr M Nasser, Mr B. Chua, Mr S. Pinni, Mr James Banerjee, Miss P. Sangster, Mr W.G. Lee, Professor D. Ralph  
<sup>1</sup>Whittington Hospital, London, United Kingdom
- P11–9 Premature Ejaculation in the United Kingdom: A Nationwide Survey exploring Insights into Contemporary Urology Practices**  
Dr Imaad Amanulla<sup>1</sup>, Mr Mohamed Mubarak<sup>1</sup>, Professor Vaibhav Modgil<sup>1</sup>, Miss Theodora Stasinou<sup>1</sup>, Professor Ian Pearce<sup>1</sup>  
<sup>1</sup>Manchester Andrology Research Collaborative (MARC), Manchester, United Kingdom
- P11–10 Rising incidence of penile squamous cell carcinoma (PSCC) and p16 distribution trends: A retrospective single-centre analysis from 2013 to 2023**  
 Joecelyn Kirani Tan<sup>2</sup>, Dr Xu Xuan Lim<sup>1</sup>, Dr Nathanael T Tuffa<sup>2</sup>, Rosalind Walsh<sup>2</sup>, Mr Kenneth Paterson<sup>1</sup>, Dr Diego Sanchez<sup>2</sup>, Dr Pedro Oliveira<sup>1</sup>, Mr Ashwin Sachdeva<sup>1</sup>, Mr Arie Parnham<sup>1</sup>, Prof Vijay Sangar<sup>1</sup>  
<sup>1</sup>Christie Hospital, Manchester, United Kingdom, <sup>2</sup>University of Manchester, Manchester, United Kingdom

| 15.45 – 16.45 | OLYMPIA  | EPOSTER      |

## 13 GENERAL UROLOGY (BPH/ MALE LUTS/ EMERGENCY/ TRAUMA)

Chairs: TBC

- P13–1** **The WASHOUT study: early proactive intervention in emergency haematuria reduces length of stay, mortality and readmissions**  
Ms Nikita Bhatt<sup>1</sup>, Kevin Byrnes, Simona Ippoliti, Raghav Varma, Bing Jie Chow, Quentin Mak, Nikki Kerdegari, Aqua Asif, Arjun Nathan, Alexander Ng, Yazan Qaoud, Luke Lavallee, Anna Ireland, Joanne Cresswell, Amrut Phonde, Kumar Madhavan, Piyush Bhargav Sarmah, Molly Nichols, James Green, Ahmed Ahmayda, Graeme MacLennan, Kevin Gallagher, Sinan Khadhour, Veeru Kasivisvanathan  
<sup>1</sup>St Vincent's University Hospital, Dublin, Ireland
- P13–2** **The WASHOUT study: workup and management of patients with emergency haematuria across the world**  
Ms Nikita Bhatt<sup>1</sup>, Kevin Byrnes, Simona Ippoliti, Raghav Varma, Bing Jie Chow, Quentin Mak, Nikki Kerdegari, Aqua Asif, Arjun Nathan, Alexander Ng, Yazan Qaoud, Luke Lavallee, Anna Ireland, Joanne Cresswell, Amrut Phonde, Kumar Madhavan, Piyush Bhargav Sarmah, Molly Nichols, James Green, Ahmed Ahmayda, Graeme MacLennan, Kevin Gallagher, Sinan Khadhour, Veeru Kasivisvanathan  
<sup>1</sup>St Vincent's University Hospital, Dublin, Ireland
- P13–3** **Reducing Unnecessary Outpatient Appointments: Virtual LUTS Triage Using IPSS/QOL Stratification in a High-Volume NHS Service**  
Mr DON WIJAYASURIYA<sup>1</sup>, Dr Esther Thomas, Mr Adam Cox  
<sup>1</sup>Royal Gwent Hospital, Newport, United Kingdom
- P13–4** **Robotic Aquablation for treatment of bladder outlet obstruction, can it democratise theatre time compared to Holmium enucleation?**  
Miss Deepika Reddy<sup>1</sup>, Hanna Maroof<sup>1</sup>, Elsie Mensah<sup>1</sup>, Oussama El Hage<sup>1</sup>, Sachin Malde<sup>1</sup>, Jonathan Noel<sup>1</sup>, Rick Popert<sup>1</sup>, Benjamin Challacombe<sup>1</sup>  
<sup>1</sup>Guy's and St Thomas' Hospital, London, United Kingdom
- P13–5** **PuraStat (RADA16) for radiation cystitis-related severe haematuria: 3-month control and reduced healthcare utilisation in a live register**  
Mr Petre Cristian Ilie<sup>2</sup>, Miss Anne Carrie<sup>1</sup>, Mr Radu Croitoru<sup>2</sup>, Mr Dimitar Ormanov<sup>2</sup>, Prof Lee Smith<sup>3</sup>  
<sup>1</sup>Norfolk And Norwich University Hospital, Norwich, United Kingdom, <sup>2</sup>The Queen Elizabeth Hospital, King's Lynn, United Kingdom, <sup>3</sup>Anglia Ruskin University, Centre for Health Performance and Wellbeing, Cambridge, United Kingdom

Tuesday 16 June 2026

- P13–6** **Evaluating the Utility of the TWIST Score in Acute Testicular Pain: Audit of a single centre experience.**  
Mr Khaled Ghanem<sup>1</sup>, Dr Asma Jamil<sup>1</sup>, Mr Yasir Khan<sup>1</sup>, Ms Quratulain Akbar<sup>1</sup>, Mr Junaid Masood<sup>1</sup>  
<sup>1</sup>Barking, Havering and Redbridge NHS Trust, Ilford, London, United Kingdom
- P13–7** **Early comparative outcomes of minimally invasive surgical therapies (UroLift, Rezūm and iTIND): a single-centre experience in the management of benign prostatic enlargement**  
Dr Abhinav Chaudhary<sup>1</sup>, Mr Keng Lim Ng<sup>1</sup>, Mr Neil Barber<sup>1</sup>  
<sup>1</sup>Frimley Park Hospital, Frimley, United Kingdom
- P13–8** **CLEAR RCT through 12 Months: Better Early Recovery with UroLift PUL vs Rezum with Comparable Durability**  
Mr Neil Barber<sup>1</sup>, Mr. Mark Rochester<sup>2</sup>, Dr. Brian Mazzarella<sup>3</sup>, Dr. Christopher Cantrill<sup>4</sup>, Dr. Bilal Chughtai<sup>5</sup>, Dr. Arnold Cinman<sup>6</sup>, Dr. Jeffrey Schiff<sup>7</sup>, Dr. Claus Roehrborn<sup>8</sup>  
<sup>1</sup>Frimley Health NHS Foundation Trust/ Cromwell Hospital, Surrey, United Kingdom, <sup>2</sup>Norfolk and Norwich University Hospital, Norwich, United Kingdom, <sup>3</sup>Urology Austin, Austin, USA, <sup>4</sup>Urology San Antonio, San Antonio, USA, <sup>5</sup>Plainview Hospital, Syosset, USA, <sup>6</sup>Tower Urology, Los Angeles, USA, <sup>7</sup>NYU Langone, New York City, USA, <sup>8</sup>UT Southwestern, Dallas, USA
- P13–9** **True Daycase HoLEP**  
Miss JESSIE BLACKBURN<sup>1</sup>, Miss Tiffany Silverside<sup>1</sup>, Miss Tharani Nitkunan<sup>1</sup>  
<sup>1</sup>Epsom And St Helier Nhs Trust, London, United Kingdom
- P13–10** **Underuse of Vaginal Oestrogen Therapy in Postmenopausal Women with Recurrent Urinary Tract Infections: A Call for Increased Awareness and Guideline Adherence**  
Dr Shideh Arameshfard<sup>1</sup>, Dr Toska Ukaj, Dr Anjali Patel, Dr Neysa Patel, Dr Shannel Darku, Dr Aislinn Pedersen, Ms Izabela Maj, Mr Virgiliu Bodean, Mr Farooq Khan, Mr Anish Pushkaran  
<sup>1</sup>Luton And Dunstable Hospital, Luton, United Kingdom

Wednesday 17 June 2026

| TIME        | LOCATION        | SESSION TYPE |
|-------------|-----------------|--------------|
| 08.00-09.00 | CATHERINE LEWIS | EPOSTER      |

## 14 STONES, IMAGING AND UPPER TRACT DISORDERS 2

Chairs: Ninaad Awsare, Whiston Hospital, Prescott & Damien Bolton, USANZ President

### P14-1 **Multi-centre International Comparison of Conventional versus Laser Cystolithotripsy for the Management of Bladder Stones: 30-day Outcomes from the EAU Endourology Bladder Lithiasis Assessment of Surgical Treatment in real world practice (BLAST) study** palliative setting - a high volume single centre study

Ms Sohani Dassanayake<sup>1</sup>, Prof Bhaskar Somani<sup>1</sup>, Dr Clara Cerrato<sup>1</sup>, Dr Steffi K. K. Yuen<sup>2</sup>, Dr Angelo Cormio<sup>3</sup>, Prof Arun Chawla<sup>4</sup>, Dr Jaisukh Kakathia<sup>5</sup>, Dr Azizbek Shomarufov<sup>6</sup>, Dr Ender Cem Bulut<sup>7</sup>, Dr Tianyu Li<sup>8</sup>, Dr Zijie Chai<sup>9</sup>, Dr Wei Zhu<sup>9</sup>, Dr Deepak Ragoori<sup>10</sup>, Dr Daniele Castellani<sup>11</sup>, Ms Amelia Pietropaolo<sup>1</sup>, Prof Vineet Gauhar<sup>12</sup>

<sup>1</sup>University Hospital Southampton NHS Foundation Trust, Southampton, United Kingdom,

<sup>2</sup>The Chinese University of Hong Kong, China, <sup>3</sup>Policlinico Riuniti di Foggia, University of Foggia, Foggia, Italy, <sup>4</sup>Kasturba Medical College, Manipal Academy of Higher Education, Karnataka, India, <sup>5</sup>Fortune Urology Clinic, Gujarat, India, <sup>6</sup>Republican Specialized Scientific and Practical Medical Center of Urology, Tashkent, Uzbekistan, <sup>7</sup>Gazi University, Turkey,

<sup>8</sup>The First Affiliated Hospital of Guangxi Medical University, China, <sup>9</sup>The First Affiliated Hospital of Guangzhou Medical University, China, <sup>10</sup>Asian Institute of Nephrology and Urology, India,

<sup>11</sup>Azienda Ospedaliero-Universitaria Ospedali Riuniti di Ancona, Italy, <sup>12</sup>Ng Teng Fong General Hospital, Singapore

### P14-2 **Retrospective review of outcomes of pyeloplasty with concomitant pyelolithotomy**

Dr Ashwini Kulkarni<sup>1</sup>, Mr Francis Keeley<sup>1</sup>, Mr Salah Albuheissi<sup>1</sup>, Miss Zsuzsanna Zotter<sup>1</sup>, Mr Anthony Timoney<sup>1</sup>

<sup>1</sup>Bristol Urological Institute, Bristol, United Kingdom

### P14-3 **Reassessing Antibiotic Prophylaxis in Shockwave Lithotripsy: A Systematic Review and Meta-analysis of Randomized Trials**

Dr Saied Mohammed Saied Qasem<sup>1</sup>, Dr Ahmed Naji Ahmed Hassan, Dr Mustafa Ali Almomani, Dr Mohamad Wasfi Alsawalmeh, Dr Lara Hamzeh Hamzeh, Dr Asmaa Hamdy Abdellatif, Dr Mostafa Eyad Mostafa Mousa

<sup>1</sup>Faculty of Medicine, Ankara Yıldırım Beyazıt University, Ankara, Turkey, Ankara, Turkey,

<sup>2</sup>Faculty of Medicine, Sudan University of Science and Technology, Khartoum, Sudan,

Khartoum, Sudan, <sup>3</sup>Faculty of Pharmacy, Jordan University of Science and Technology, Ar-Ramtha, Jordan, <sup>4</sup>Faculty of Pharmacy, Jordan University of Science and Technology,

Ar-Ramtha, Jordan, <sup>5</sup>Faculty of Medicine, Caucasus International University, Tbilisi, Georgia,

<sup>6</sup>Faculty of Medicine, Qena University, Qena, Egypt, Qena, Egypt, <sup>7</sup>Faculty of Medicine, Hashemite University, Alzarka, Jordan

Tuesday 16 June 2026

- P14–4 Optimizing Symptom Control After Ureteral Stent Placement: A Systematic Review of Pharmacological Interventions from EAU Endourology**  
 Arianna Pischetola, [Dr Yuan Wen Ooi](#)<sup>1</sup>, Ali Talyshinskii, Professor Bhaskar Somani  
<sup>1</sup>University Hospital Southampton, Southampton, United Kingdom
- P14–5 Improving Patient Understanding Following Renal Colic Through Targeted Information Leaflets in the Emergency Department**  
[Miss Sai Kalpitha Eragamreddy](#)<sup>1</sup>, Miss Lap Yan Leung<sup>1</sup>, Dr Suraya Gafore<sup>1</sup>, Dr. Gaurika Bharadwaj<sup>1</sup>, Mr. Hamid Abboudi<sup>1</sup>, Mr. Tamer El-Husseiny<sup>1</sup>, Mr. Milad Hanna<sup>1</sup>, Mr. Ranan Dasgupta<sup>1</sup>  
<sup>1</sup>Department of Urology, Charing Cross Campus, Imperial College Healthcare NHS Trust, London, United Kingdom
- P14–6 Pulling the string: Patient-reported outcomes following self-removal of ureteric stents using extraction strings.**  
[Miss Aswathy Pavithran](#)<sup>1</sup>, Miss Louise Paramore<sup>1</sup>, Miss Susan Hall<sup>1</sup>, Mr Jonathan Lee<sup>1</sup>, Mr Stephen Miller<sup>1</sup>, Mr Hari Ratan<sup>1</sup>, Mr Dhaval Bodiwala<sup>1</sup>  
<sup>1</sup>Nottingham City Hospital, Nottingham, United Kingdom
- P14–7 Nurse led stone clinic for Urolithiasis: Establishing a guideline - based service using PROM triage**  
[Mr Manash Chakraborty](#)<sup>1</sup>, Mr Sabin Yadav<sup>1</sup>, Mrs Alison Wiles<sup>1</sup>, Miss Hannah Wells<sup>1</sup>, Professor Hrishu Joshi<sup>1</sup>  
<sup>1</sup>University Hospital of Wales, Cardiff, United Kingdom
- P14–8 Exome-wide association of kidney stone disease in the UK Biobank**  
[Dr Catherine Lovegrove](#)<sup>1,2</sup>, Professor Michael Holmes<sup>3</sup>, Professor Dominic Furniss<sup>2,4</sup>, [Professor Sarah Howles](#)  
<sup>1</sup>Glasgow University, Glasgow, United Kingdom, <sup>2</sup>University of Oxford, Oxford, United Kingdom, <sup>3</sup>University of Bristol, Bristol, United Kingdom, <sup>4</sup>Oxford University Hospitals NHS Foundation Trust, Oxford, United Kingdom
- P14–9 Retrograde Intrarenal Surgery Versus Mini-Percutaneous Nephrolithotomy for Treatment of Medium size pediatric renal stones (10–20millimeters). A Randomized controlled trial**  
[Dr Ramy Elbaz](#)<sup>1</sup>, Dr Mahmoud Lamon, Prof Tamer Helmy, Prof Mahmoud Kenawy, Prof Ahmed Shoma  
<sup>1</sup>Urology and Nephrology Center, Mansoura, Egypt, <sup>2</sup>Scunthorpe General Hospital, Scunthorpe, United Kingdom
- P14–10 An automated stent registry within EPIC electronic patient record**  
[Miss Helen Stephens](#)<sup>1</sup>, Ms Ann Crump<sup>1</sup>, Mr Luke Foster<sup>1</sup>, Prof Ben Grey<sup>1</sup>, Mr Thomas Brophy<sup>1</sup>  
<sup>1</sup>Manchester Foundation Trust, Manchester, United Kingdom

| 08.00 – 09.00 | PADDY O'REILLY | EPOSTER      |

## 17 GENERAL - URO-TECHNOLOGY, AI AND UROLOGY APPS

Chairs: Kathryn Bandeira, Wycombe Hospital, High Wycombe & Ankur Mukherjee, Worcestershire Royal Hospital

### P17–1 Development and validation of a deep learning tool for automated reading of fluorescence confocal microscopy images in radical prostatectomy

Mr Nikhil Mayor<sup>1</sup>, Mr Lixiang Fang<sup>1</sup>, Dr Anna Silvanto<sup>2</sup>, Dr Aiman Haider<sup>2</sup>, Dr Ricardo Almeida-Magana<sup>2</sup>, Professor Greg Shaw<sup>2</sup>, Professor Hashim Ahmed<sup>1</sup>, Dr Francesca Fiorentino<sup>3</sup>, Dr Stamatia Giannarou<sup>1</sup>, Mr Mathias Winkler<sup>1</sup>, et al.

<sup>1</sup>Imperial College London, London, United Kingdom, <sup>2</sup>University College London, London, United Kingdom, <sup>3</sup>University of Leeds, Leeds, United Kingdom

### P17–2 Comparative validation of AI-assisted MRI screening pathways in the IPI-PROSTAGRAM study

Mr Nikhil Mayor<sup>1</sup>, Dr Antony Rix<sup>2</sup>, Dr Aarti Shah<sup>3</sup>, Ms Natalia Klimowska-Nassar<sup>1</sup>, Dr Henry Tam<sup>1</sup>, Dr Heminder Sokhi<sup>4</sup>, Mr Mathias Winkler<sup>1</sup>, Mr David Eldred-Evans<sup>1</sup>, Professor Anwar Padhani<sup>5</sup>, Professor Hashim Ahmed<sup>1</sup>, et al.

<sup>1</sup>Imperial College London, London, United Kingdom, <sup>2</sup>Lucida Medical Ltd, Cambridge, United Kingdom, <sup>3</sup>Hampshire Hospitals NHS Foundation Trust, Winchester, United Kingdom, <sup>4</sup>Hillingdon Hospitals NHS Foundation Trust, London, United Kingdom, <sup>5</sup>Paul Strickland Scanner Centre, Middlesex, United Kingdom

### P17–3 Investigating the Use of Virtual Reality to Enhance the Consent Process and Provide Counselling for Patients Undergoing Shock Wave Lithotripsy

Mr Solomon Bracey<sup>1</sup>, Mr Dara Bamerni<sup>1</sup>, Ms Phoebe Reynolds, Surgassists, Cornwall, UK, Ms Loretta Tear<sup>1</sup>, Ms Tanya Davis<sup>1</sup>, Dr Maria Frasccheri<sup>1</sup>, Dr Amelia Pietropaolo<sup>1</sup>, Professor Bhaskar Somani<sup>1</sup>

<sup>1</sup>Southampton General Hospital, Southampton, United Kingdom

### P17–4 Shifting GEARS in the Operating Room: Using Multiple Surgical Robots in Clinical Practice

Dr Noor Haddad<sup>1</sup>, Mr Mehrshad Sultani Tehrani<sup>1</sup>, Professor Ben Challacombe<sup>1</sup>

<sup>1</sup>Guy's and St Thomas' NHS Foundation Trust, London, United Kingdom

### P17–5 Validation and clinical implementation of a Machine Learning model for predicting sepsis risk following ureteroscopy: a web-based decision support tool from EAU Urotechnology

Miss Demetra Fuligni<sup>1</sup>, Carlotta Nedbal, Vineet Gauhar, Daniele Catellani, Frédéric Panthier, Jeremy Y. C. Teoh, Ben H. Chew, Khi Yung Fong, Nariman Gadzhiev, Bhaskar Somani

<sup>1</sup>Southampton General Hospital, southampton, United Kingdom

Wednesday 17 June 2026

- P17–6** **Can AI Hold Its Water? Agreement Between Consultants and an AI Triage Tool – a Pilot Diagnostic Concordance Study**  
Dr Azeem Kapasi<sup>1</sup>  
<sup>1</sup>Salford Royal Foundation Trust, Manchester, United Kingdom
- P17–7** **A purpose-built patient-app platform to improve efficiency and sustainability in a post-MRI prostate cancer virtual clinic**  
Mr Petre Cristian Ilie<sup>2</sup>, Miss Anne Carrie<sup>1</sup>, Mr Mykhaylo Kostyuk<sup>2</sup>, Mr Radu Croitoru<sup>2</sup>, Mr Dimitar Ormanov<sup>2</sup>, Prof Lee Smith<sup>3</sup>  
<sup>1</sup>Norfolk And Norwich University Hospital, Norwich, United Kingdom, <sup>2</sup>The Queen Elizabeth Hospital, King's Lynn, United Kingdom, <sup>3</sup>Anglia Ruskin University, Centre for Health Performance and Wellbeing, Cambridge, United Kingdom
- P17–8** **Efficacy and Safety of the UVapor® System water vapor thermal therapy in Patients with Benign Prostatic Hyperplasia: A Prospective, Multicenter, Single-blind, Randomized Controlled Trial**  
Dr Yujie Dong<sup>1</sup>, Dr Yang Yang<sup>1</sup>, Dr Xu Zhang<sup>1</sup>, Dr Yu Gao<sup>1</sup>  
<sup>1</sup>The Third Medical Center of Chinese PLA General Hospital, Beijing, China
- P17–9** **Patient-Reported Urinary and Sexual Outcomes: Aquablation Versus HoLEP**  
Dr Shiv Sarna<sup>1</sup>, Mr Simon McGurk<sup>1</sup>, Mr Shaun James<sup>1</sup>, Dr Husam Al Maliki<sup>1</sup>, Mr Sachinka Ranasinghe<sup>1</sup>, Mr Johann Boaz<sup>1</sup>, Mr Mark Rochester<sup>1</sup>  
<sup>1</sup>Norfolk And Norwich University Hospital, Norwich, United Kingdom
- P17–10** **Ejaculatory function preservation and restoration following robotic Aquablation for prostatic bladder outflow obstruction: a large real-world case series**  
Mr Thomas H Newman<sup>1</sup>, Dr Diana Shroff<sup>1</sup>, Dr Sakshi Rajain<sup>1</sup>, Miss Thomasia Azavedo<sup>1</sup>, Miss Elsie Mensah<sup>1</sup>, Mr Jonathan Noël<sup>1</sup>, Mr Sachin Malde<sup>1</sup>, Mr Rick Popert<sup>1</sup>, Miss Clarissa Martyn-Hemphill<sup>1</sup>  
<sup>1</sup>Guy's and St Thomas' Hospital, London, United Kingdom

# TEACHING AND SKILLS COURSES

## WELCOME FROM THE DEPUTY VICE-PRESIDENT, EDUCATION

Welcome to the BAUS 2026 Teaching and Skills Courses programme. Education, practical skills development and support across all career stages remain central to the work of BAUS, and this year's programme brings together a broad, relevant and high-quality range of courses designed for trainees, SAS and locally employed doctors, consultants and members with specialist or generalist practice needs.

As ever, we look closely at member feedback from previous years and also try to vary the course offering bringing in new innovative courses and rotating some.

This year we are pleased to launch a NOTSS course, using simulation-based scenarios to develop non-technical skills including communication, teamwork, situational awareness, decision-making and leadership. Many thanks to Majid Shabbir, Kasra Saeb Parsy and Nicholas Raison for developing this. Another brand new course is the Navigating Your Consultant Career course, focusing on how plan and gets the most from the early, mid and latter stages of the consultant career, dealing with common themes, challenges and decisions. Asif Muneer, Richard Parkinson and Tim O'Brien will guide delegates through this.

We are delighted to offer a strong programme of hands-on skills training. The ever-popular Hands-on Ultrasound Training course returns, giving delegates practical small-group experience in urological point-of-care ultrasound, including kidneys, bladder, testes and prostate volume assessment. The LA Transperineal Biopsy of Prostate course also returns, with an updated focus on MRI-guided targeted biopsy, patient pathway optimisation and exposure to a range of biopsy systems, fusion platforms and robotic technology. For those new to robotic surgery, the Introduction to Robotics course provides a valuable opportunity to gain supervised experience across contemporary robotic platforms.

The teaching course programme reflects the breadth of modern urological practice. Modern Management of Stone Disease makes a return and will cover contemporary evidence and guidance for ureteric, renal, asymptomatic and pregnancy-related stone disease, as well as metabolic management. There is a strong international faculty. The popular Paediatric Urology course continues to support those managing children outside specialist units and remains particularly valuable for FRCS(Urol) preparation and general urological practice. Good Urodynamics Practice, led by Professor Hashim Hashim, again provides focused, practical teaching on trace interpretation, quality control and troubleshooting.

**WE ARE  
DELIGHTED TO OFFER  
A STRONG PROGRAMME  
OF HANDS-ON SKILLS  
TRAINING.**

## Teaching and Skills Courses continued

We are also pleased to include courses addressing important areas of day-to-day clinical practice. Management of Functional Urology Emergencies offers a practical approach to complex and sometimes high-risk scenarios including urinary tract injury, prosthesis emergencies, reconstructed urinary tracts and neuropathic emergencies. Do's and Don'ts in Andrology will give general urologists practical guidance on common andrological presentations, including penile lesions, circumcision, urethral stricture disease, Peyronie's disease, hypogonadism and male infertility.

A key feature of this year's programme is career development and professional practice. In addition to our Navigating Your Consultant Career course, the new Urology NTN Portfolio Masterclass will support those preparing for national selection, while Navigating the Portfolio Pathway: A Roadmap to Success will provide structured guidance for colleagues planning the next stage of their professional journey.

I am very grateful to all Course Directors, faculty members, BAUS Sections and the BAUS Events Team for their work in developing and delivering this programme. Places on many courses are limited, particularly the hands-on sessions, so early registration is strongly encouraged. We look forward to welcoming you to an engaging, practical and inspiring programme at BAUS 2026.

**Rob Calvert**  
Deputy Vice-President,  
Education

# COURSE 1: TEACHING COURSE

## MODERN MANAGEMENT OF STONE DISEASE

**MONDAY 15 JUNE**

**11:15- 13:15**

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Jake Patterson, Royal Hallamshire Hospital, Sheffield

### **Aims and Objectives**

Present contemporary evidence and guidance for treating common endourological problems, including ureteric and renal stones, incidental stones, stones in pregnancy and metabolic management. There will be opportunity to discuss with an expert faculty and answer any questions the session may create.

Topics covered:

- Ureteric stones
- Larger renal stones
- Asymptomatic renal stones
- Stones in pregnancy
- Metabolic investigation and management of stone disease

### **Faculty**

Steffi Yuen, Consultant Urologist, The Chinese University of Hong Kong. Li Shu Fan International Professor, The Royal College of Surgeons of Edinburgh

Dr Frédéric Panthier, Hôpital Européen Georges-Pompidou

Ms Kim Davenport, Cheltenham General Hospital

Prof Bhaskar Somani, University Hospital Southampton

# COURSES 2, 4 & 5: SKILLS COURSE

## HANDS ON ULTRASOUND TRAINING

MONDAY 15 JUNE 11:15- 13:15 GALLERY SUITE

MONDAY 15 JUNE 13:45 – 15:45 GALLERY SUITE

MONDAY 15 JUNE 16:00 – 18:00 GALLERY SUITE

**16 Places - Cost: £50 BAUS Member & £90 Non-Member**

**Course Director:** Mr Tamer El-Husseiny, Consultant Urologist, Charing Cross Hospital, London  
Dr Neeral Patel, Consultant Uro-radiologist, Charing Cross Hospital, London  
Mr Asad Abedin, Consultant Urologist, Russells Hall Hospital, Dudley

### Aims and Objectives

Point of care ultrasound scanning (POCUS) is fast becoming an important skill across medicine, to improve bedside patient assessment, both in the emergency & elective setting. To this end, this course will allow delegates to be taught hands on ultrasound scanning technique of the kidneys, bladder and testes, in small groups with a faculty member. We have arranged for patients who have appropriate pathologies, to be present as subjects for scanning. High end ultrasound machines will be provided by Fujifilm (formerly Hitachi). Each station will have 5 candidates with one faculty member and patients with some of the following pathologies. The aim is to help candidates in becoming confident in level 1 urological ultrasound scanning, i.e. being able to recognise normal anatomy, detecting when something is abnormal and referring on for further imaging.

### The following areas will be covered within this course:

1. Technique of performing an ultrasound scan of the kidneys, urinary bladder, testes and transabdominal scan of the prostate (measuring prostate volume).
2. How to optimise an ultrasound image, using the common machine knobs controlling overall gain, time-gain compensation, focus, depth and scanning frequency.
3. Recognition of the normal appearance of the kidneys, urinary bladder, testes and prostate.
4. Recognition of some of these common abnormalities within the urinary tract:
  - a. Renal cysts.
  - b. Hydronephrosis.
  - c. Renal stones.
  - d. Small renal masses.
  - e. Thick walled bladder & trabeculation.
  - f. Prostate enlargement, median lobe of the prostate.
  - g. Epididymal cysts.
  - h. Hydrocele.
  - i. Varicocele.

# COURSE 3: TEACHING COURSE

## PAEDIATRIC UROLOGY

MONDAY 15 JUNE

13:45 - 15:45

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Navroop Johal, Consultant Paediatric Urologist, Great Ormond St Hospital for Children

### **Aims and Objectives**

The aim of this course is to reinforce and support the practice of paediatric urology outside a specialist unit. We are grateful that we can continue to provide a focus on children within the BAUS meeting and an opportunity for established Consultants and interested trainees to meet. There will also be didactic mini lectures on key topics, each led by a paediatric urologist and illustrated by appropriate clinical scenarios. We do hope, as usual, to provide an interactive feast that will leave delegates better equipped – be it for forthcoming FRCS (Urol) exams or their next paediatric clinic.

### **Faculty**

Abraham Cherian, Consultant Paediatric Urologist, Great Ormond St Hospital for Children  
Divyesh Desai, Clinical Lead and Director of Urodynamics, Great Ormond St Hospital for Children  
Alex Cho, Consultant Paediatric Urologist, Great Ormond St Hospital for Children  
Miss Neetu Kumar, Consultant Paediatric Urologist, Great Ormond St Hospital for Children  
Miss Alice Mears, Consultant Paediatric Urologist, Lister and Stevenage Hospital

# COURSE 6: TEACHING COURSE

## MANAGEMENT OF FUNCTIONAL UROLOGY EMERGENCIES

**MONDAY 15 JUNE 16.30 - 18.00**

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Sachin Malde, Guy's & Thomas's Hospital

### Aims and Objectives

This course is essential for all urologists that will encounter functional urological emergencies in their practice, especially for those with a specialist interest in functional and reconstructive urology. Through interactive lectures, this course aims to provide a step-by-step practical guide for the diagnosis, evaluation, and treatment of commonly encountered emergencies. This includes the management of iatrogenic urinary tract injuries, ureteric and bladder reconstruction, emergencies in neuropaths, and emergencies in pregnancy, where relevant to functional and reconstructive urology

- 16.30-16.40** Introduction – Sachin Malde
- 16.40-16.55** Bladder/ureteric injury and fistula – Suzanne Biers
- 16.55-17.10** Prosthesis (AUS/SNM) emergencies – Andy Kozan
- 17.10-17.20** Break
- 17.20-17.35** Emergencies in reconstructed urinary tracts/continent bladder replacement/Mitrofanoff – Sachin Malde
- 17.35-17.50** Emergencies in neuropaths – autonomic dysreflexia, neurogenic bladder and spinal shock, cauda equina? – Nicholas Faure-Walker
- 17.50-18.00** Management of Intraoperative Complications in Open Procedures – arterial, venous, rectal – Sachin Malde

### Faculty

Suzanne Biers, Addenbrooke's Hospital, Cambridge

Nicholas Faure-Walker, Epsom General Hospital, Surrey

Andy Kozan, St James's University Hospital, Leeds

# COURSE 7: TEACHING COURSE

## DO'S AND DON'T'S IN ANDROLOGY – SURGICAL TIPS AND TRICKS FOR THE GENERAL UROLOGIST

**TUESDAY 16 JUNE 10:45 - 12:15**

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Vaibhav Modgil, Manchester Royal Infirmary

### Aims and Objectives

This course has been specifically designed for urologists looking after andrological patients in their practice. Through interactive lectures, which will include pictures and videos to illustrate the important points, this course aims to provide a step-by-step practical guide for the diagnosis, evaluation, and treatment of commonly encountered andrological pathologies. This includes the assessment and management of suspicious penile lesions, avoiding the common pitfalls during circumcision, choosing the right option for urethral stricture disease, avoiding failures in plication for penile straightening surgery, testosterone replacement therapy initiation and management, and ensuring patients with male factor infertility are investigated appropriately regardless of which clinic they attend.

1. Suspicious penile lesions – Topical treatments and surgical management, Aditya Manjunath
2. Circumcision – avoiding the common pitfalls, and knowing when not to operate, Peter Grice
3. Urethral stricture disease: urethrotomy vs dilation vs urethroplasty – choosing the right patient, Paul Anderson
4. Plication techniques in Peyronie's disease – how to optimise outcomes, Holly Ni Raghallaigh
5. Investigation, diagnosis and management of Hypogonadism – all you need to know in 15 minutes, Mohit Khera
6. Ensuring equity of management for men with infertility – your complete outpatient guide, Susan Wong

### Faculty

Susie Wong, Leicester General Hospital  
 Paul Anderson, Russells Hall Hospital, Dudley  
 Peter Grice, Imperial College, London  
 Holly Ni Raghallaigh, St George's Hospital, London  
 Mo Khera, Baylor College of Medicine  
 Adi Manjunath, Southmead Hospital, Bristol

# COURSES 8, 10 & 12

## LA TRANSPERINEAL BIOPSY OF PROSTATE

TUESDAY 16TH JUNE 10:45 – 12:15 GALLERY SUITE

TUESDAY 16TH JUNE 13:15 – 15:15 GALLERY SUITE

TUESDAY 16TH JUNE 15:45 – 17:45 GALLERY SUITE

**20 Places – Cost: £50 BAUS Member & £90 Non-Member**

**Course Director:** Stefanos Bolomytis, Southmead Hospital, Bristol

### Aims and Objectives

- Understand the role of prostate MRI in the diagnostic pathway and apply MRI findings to guide targeted prostate biopsy.
- Describe the principles and workflow of LAMP biopsy, including patient preparation, procedural steps, and post-procedural care.
- Understand key principles of local anaesthetic safety relevant to LAMP biopsy, including dosing, administration, and management of complications.
- Gain hands-on experience with LAMP biopsy techniques using a range of transperineal access devices, fusion platforms, and a robotic system.
- Compare different biopsy systems to support informed technique and device selection in clinical practice.
- Apply best-practice approaches to optimise diagnostic accuracy, patient experience, and procedural safety.

### Faculty

Dr Douglas Kopcke – Consultant Radiologist

Dr Pat Walker – Anaesthesiologist

Mr Hide Yamamoto – Urologist

Mr Motaz Hasan – Urologist

Mr Amar Mohee – Urologist

Mr Nadeem Iqbal – Urologist

# COURSE 9: TEACHING COURSE

NOTTS

**TUESDAY 16 JUNE 16.30 - 18.00**

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Majid Shabbir, Guy's & Thomas's Hospital  
Kasra Saeb Parsy, Addenbrooke's Hospital, Cambridge  
Nicholas Raison, Addenbrooke's Hospital, Cambridge

## Course Overview

Surgical training traditionally focusses on honing your diagnostic and technical skills. However, successful outcomes in surgery go beyond just improving your operative technique. It is well recognised that the majority of surgical errors and complications occur as a result of non-technical factors.

Non-technical skills (NTS) encompass the cognitive, personal, and social skills critical for safe and effective surgery and are based on lessons learned from the aviation industry. Like technical skills, non-technical skills require dedicated, focused training and deliberate practice, but are poorly taught in most surgical programs.

This interactive course introduces delegates to the key concepts of non-technical skills for surgeons. An expert faculty will highlight learning points and common pitfalls in emergency and difficult clinical scenarios, equipping participants with the necessary NTS skills to navigate them safely. Training utilises simulation-based scenarios designed to mirror real clinical challenges. Delegates will have the opportunity to actively participate and practice key skills including effective communication, collaborative teamwork, maintenance of situational awareness, and timely decision-making in high-pressure environments. This course is suitable for people at any stage of their training or consultant practice.

## Faculty

Nicholas Raison, Addenbrooke's Hospital, Cambridge  
Kasra Saeb Parsy, Addenbrooke's Hospital, Cambridge  
Majid Shabbir, Guy's & Thomas's Hospital  
Abdullatif Aydin, Charing Cross Hospital, London

## Learning Objectives

By the end of this course, participants will be able to:

- Understand the key concepts non-technical skills training and its impact on surgical outcomes and patient safety
- Apply core NTS domains in surgical practice: situational awareness, decision-making, communication, and leadership
- Recognise common NTS pitfalls in emergency and difficult scenarios and strategies to mitigate them
- Translate learning into practice by reflecting on personal strengths and applying NTS principles to their own surgical team

## Course 9: Teaching Course – NOTTS continued

### Course Structure

The course combines didactic teaching with interactive, simulation-based learning. Expert faculty will present evidence-based concepts, followed by delegates undertaking simulation-based scenarios in which they practice NTS skills in realistic clinical contexts. Debriefing sessions encourage reflection and translation of learning into clinical practice, in which participants analyse, discuss, and consolidate their experience.

|                                       |  |
|---------------------------------------|--|
| <b>Introduction lecture (15 mins)</b> | Overview of NTS and the four domains     |
| <b>Simulation Scenario 1 (15 min)</b> | Emergency case with active participation |
| <b>Debriefing 1 (20 min)</b>          | Structured reflection and analysis       |
| <b>Simulation Scenario 2 (15 min)</b> | Emergency case with active participation |
| <b>Debriefing 2 (20 min)</b>          | Structured reflection and analysis       |
| <b>Wrap-Up (10 min)</b>               | Summary, key takeaways, and Q&A          |

# COURSE 11: TEACHING COURSE

## GOOD URODYNAMICS PRACTICE

**TUESDAY 16 JUNE 15.45 - 17.45**

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Hashim Hashim, Southmead Hospital, Bristol

### **Aims and objectives:**

This course aims to provide focused teaching to enable urologists to improve their skills in urodynamics. There will be an emphasis on practical aspects of urodynamics including interpretation of traces, quality control and trouble-shooting. The speakers are involved in similar courses, which have been running successfully in the United Kingdom and Internationally. The small group format has been shown to work well in addressing individual needs. Access to teaching aids will simulate the clinical scenario as much as possible. The aim is to teach and emphasize good urodynamic practice using accepted international standards. At the end of the workshop delegates should feel more confident in their practice of urodynamics, specifically interpretation of traces which is a required skill for the FRCS (Urol) viva examination.

|  |               |
|--|---------------|
| <b>Introduction (10 mins)</b>  | Hashim Hashim |
| <b>Physics of Urodynamics in a nutshell (15 mins)</b>                          | Laura Thomas  |
| <b>Update on Good Urodynamics Practice (15 mins)</b>                           | Hashim Hashim |
| <b>Troubleshooting (30 mins)</b>   | Laura Thomas  |
| <b>Interpretation of Results and Traces using clinical scenarios (45 mins)</b> | Hashim Hashim |
| <b>Conclusion (5 mins)</b>   | Hashim Hashim |

### **Faculty**

Dr Laura Thomas, Consultant Clinical Scientist, Bristol Urological Institute, Bristol

# COURSE 13: TEACHING COURSE

## THE UROLOGY NATIONAL TRAINING NUMBER (NTN) PORTFOLIO MASTERCLASS

WEDNESDAY 17TH JUNE

9.00 – 10.30

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Sami Mustafa, Royal Preston Hospital

### **Aim and objectives:**

- Improving understanding of portfolio scoring criteria for ST3 national selection
- Providing guidance on strengthening key portfolio domains including audit, research, teaching, leadership, and commitment to specialty
- Highlighting practical strategies to maximise achievable portfolio points before application submission
- Reviewing examples of high-scoring portfolios and common pitfalls
- Supporting early preparation prior to shortlisting and interview stages
- Increasing candidate confidence and readiness for the NTN application process

### **Faculty**

Amer Khamal Hussein  
Mohamed Elajnaf  
Parthvi Vania  
Munir Al Ghazawi  
Ahmad Khalifa  
Abdul-Hadi Kafagi  
Srinath Ravichandran  
Akshay Vinoo

# COURSES 14 & 16: SKILLS COURSE

## INTRODUCTION TO ROBOTICS

WEDNESDAY 17TH JUNE 11.00 – 13.00 GALLERY SUITE

WEDNESDAY 17TH JUNE 14.30 – 16.30 GALLERY SUITE

**9 Places – Cost: £50 BAUS Member & £90 Non-Member**

**Course Director:** Muddassar Hussain, Frimley Park Hospital

### Aim and objectives:

Course aimed at robotic naïve delegates (resident doctors/consultants). Delegates will receive short presentations introducing robotics in urology and the differences between available robotic platforms. Delegates will then rotate through several skills stations providing hands-on experience with up to three robotic platforms (Intuitive, CMR, Medtronic) including dry box and simulation with experienced faculty supervision and guidance.

### Concepts of robotic urology:

Introductions to robotics and available platforms

Docking and undocking

Instruments: insertion and removal

|                  |                                 |
|------------------|---------------------------------|
| <b>Station 1</b> | Intuitive da Vinci Xi dry box   |
| <b>Station 2</b> | Intuitive da Vinci Xi simulator |
| <b>Station 3</b> | Rest                            |
| <b>Station 4</b> | CMR Versius dry box             |
| <b>Station 5</b> | CMR Versius simulator           |
| <b>Station 6</b> | CMR Versius simulator           |
| <b>Station 7</b> | Rest                            |
| <b>Station 8</b> | Medtronic Hugo simulator        |
| <b>Station 9</b> | Rest                            |

## NAVIGATING YOUR CONSULTANT CAREER

WEDNESDAY 17TH JUNE

11:00 – 13:00

**60 Places - Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Asad Abedin, Russells Hall Hospital, Dudley

We're delighted to introduce this new course offering key insights to consultants throughout their careers. We have divided a consultant career into 3 stages; new consultants (0–5 years), mid-career (5–15 years) and senior consultants (15 years and above) and have recruited seasoned campaigners, genuine key opinion leaders to enlighten the audience.

Professor Asif Muneer will cover the early stage of a consultant career. Asif is the clinical lead at UCLH and will cover the key aspects of negotiating an appropriate job plan. He will outline how young consultants can keep out of trouble in the key first few years and how to seamlessly transition from a final year specialty trainee to a consultant. Some of the key topics covered will include incidents, complaints, coroners inquests, duty of candour (practical approach). Professor Muneer will explore setting up in private practice, including pitfalls and its impact on one's work-life balance.

Mr Richard Parkinson will cover the mid-career stage. He will discuss a 4 lane model of career development, namely building a clinically excellent service, growing as an educator, taking on leadership roles (locally and nationally) and lastly driving research and innovation. Mr Parkinson has a busy medico-legal expert witness practice and will cover the take home lessons from Urological legal cases.

Mr Tim O'Brien is past president of BAUS and a senior consultant urological surgeon at Guys Hospital. He will explore the latter years of one's consultant career and the inevitable adjustments in one's working life. These include succession planning, development of mentorship and safe handing over of services. Mr O'Brien will discuss options related to the NHS pension and partial retirement. We will also explore the widespread challenges of safely transitioning from a busy full time consultant role to stepping away completely.

There will be ample opportunity for Q&A and group discussions of the above areas. Our carefully selected faculty have widespread experience across all of the domains discussed and this course promises to be deeply insightful.

### Faculty

Tim O'Brien, Guy's & Thomas's Hospital

Asif Muneer, University College Hospital, London

Richard Parkinson, King's Mill Hospital, Nottinghamshire

# COURSE 17: TEACHING COURSE

## NAVIGATING THE PORTFOLIO PATHWAY: A ROADMAP TO SUCCESS

WEDNESDAY 17TH JUNE 15.00 - 17.00

**60 Places – Cost: £45 BAUS Member & £75 Non-Member**

**Course Director:** Rickaz Raheem, Bedfordshire Hospitals NHS Trust  
Adham Ahmed, Cambridge University Hospital

### **Aim and objectives:**

- Understand the essential curriculum requirements for the portfolio pathway in urology.
- Master the evidence collection procedure necessary for completing the portfolio pathway application.
- Familiarise with the ISCP portfolio for effective documentation.
- Acquire knowledge and skills needed to prepare a robust and compelling application for the urology portfolio pathway.
