

Emergency Urology Surgical Skills course

15th April 2026

A one-day practical course where delegates will have hands on experience of a range of emergency urological surgical techniques using fresh frozen cadavers, in a simulated operating environment with experienced faculty.

Course content

- Renal trauma: emergency exploration and nephrectomy
- Approach to the ureter and anastomotic ureteric repair (end- to-end)
- Ureteric re-implantation techniques: psoas hitch and Boari flap
- Penile fracture and urethral injury repair
- Testicular torsion, testicular rupture & orchidectomy

Additional Educational Elements

- Short lecture on the surgical steps for each skill including important anatomy
- Tuition from experienced faculty, and use of surgical instruments and materials

Learning Outcomes

- Understanding and technical skills of emergency urology surgery
- Anatomy relevant to emergency surgery

Target Audience

- Priority ST5-7 and equivalent Portfolio pathway trainee and consultants
- Applications will also be considered from ST3-4

Cost: £525.00

A small number of funded places are available for East of England trainees in Urology

Your place will be confirmed following approval from the Course Director.

Places are limited to 24 delegates
