EPOSTER PRESENTATIONS

ePosters will be on display at BAUS 2017 Please read the following information regarding your presentation.

After acceptance of your poster, you will be required to submit your file electronically. The technical transformation into eposter will be managed by MULTIEPOSTER.

Please note that it will be mandatory to submit your poster file for transformation to ePoster format. No paper poster will be accepted.
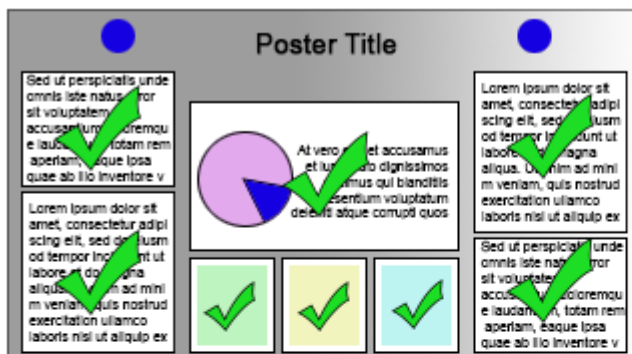

All necessary information for poster submission will be provided following the abstract selection.
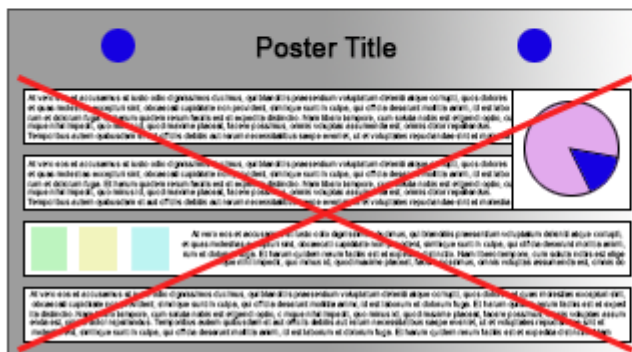

Poster format:

- Microsoft Powerpoint (PPT) is the ideal format. Please use any of the templates provided.
- PDF format is also accepted.
- Landscape format is mandatory. It is strongly recommended to use a size of 120cm wide x 90cm high, with a simple and clear typeface (Arial, Arial black, Calibri…) and regular text size no less than 28 for the body of the different sections.
- Images, pictures and graphs – the suggested resolution is 300 dpi. To check that they appear correctly on the final version, zoom in to 100% and check all images, pictures and graphs. It is better to use high quality images and graphs when creating the poster.
- Provide clear labels and headings for each section of your presentation to avoid confusion.
- Don't stretch the images manually or quality will be lost once zoomed in.

Important – Make sure your file is a single slide only (no multiple-slide PowerPoints will be accepted).

Below is an example of how your poster should be formatted.

Except for the title section, divide your poster into easy zoom-in sub-sections

Except for the title section, AVOID full width content sections

Please ensure that you include your presentation number in the top left hand corner of your ePoster.

Download the eposter Powerpoint Templates from the BAUS 2017 website to help you design your content layouts.

If you want to design your own ePoster, please make sure you include the BAUS 2017 logo which can also be downloaded from the BAUS 2017 website.

The above mentioned eposter Powerpoint Templates already include the event logo. They are a fast and simple way to transform your data into a dynamic ePoster presentation.

If you need support, please contact us at: support@multieposter.com (please include your name, email, poster number/title).
