**Does the project require ethical approval?** Yes / No (If Yes please expand on the process for gaining ethical approval)

## **BAUS DATA AND AUDIT COMMITTEE**

### **Regulations governing use of Data from the BAUS Data and Audit System**

The BAUS Data and Audit System is a repository of data collected from UK urologists and their staff in the UK. The data are collected voluntarily and nothing must be done or said to inhibit members in the act of data collection.

The data will only be used for bona fide scientific enquiry. Funding may be necessary to cover the time and expenses of the BAUS Data and Audit Manager.

Applications will be reviewed by the appropriate Section Executive Committee. Approval will be granted only if a majority of the Executive Committee members are in favour, who may if they feel it is necessary, refer it to the BAUS Trustees for final determination. The Executive Committee may seek further information, peer review or clarification of applications before approval is granted. The decision of the Data and Audit Committee is final.

#### **The following are usually expected**

- An update to the appropriate Section Executive Committee after 12 months and annually thereafter if the project is continuing.
- Presentation of results at the appropriate Section Annual Meeting, if appropriate.
- Acknowledgement of the source of the data in any report or publication to emerge from use of the database with the proviso that the results and opinions produced are the authors own interpretation and do not necessarily reflect those of the BAUS Sections.

Committees considering requests will have regard to whether the applicant(s) are BAUS members and contributors to the audits.

**I / We have read the above terms and agree to be bound by them. I / We understand that the BAUS may charge for provision of data and assistance with its interpretation.**

Signature(s) of all applicants:
